

HARDGOODS

WINTER COLLECTION 2017-18

HEAD[®]

THANK YOU LIMITS.

WHAT'S
YOUR
LIMIT?

Thank you for making me set goals.
For giving me something to strive for.
Without you Limits, there would be no challenge.
No tears.
No triumph.
Thanks to you, I grow and progress.
Forging new paths beyond the
boundaries you set.
You force me to understand
who I really am, by taunting me to
push myself harder.
Because you try to hold me back,
I cannot be stopped.
What's Your Limit?

WHAT'S
YOUR
LIMIT?

THE MAN WHO LOVED WHAT SKIING COULD BE.

For hundreds of years, ski technology barely changed. Sure, stronger woods made an appearance, camber came onto the scene, and tips and tails got wider, but that was about it. And then one day in 1947, an aeronautical engineer named Howard Head went skiing for the first time. And he was not impressed.

Howard knew there had to be a way to make skis lighter, faster, and more friendly. He set to work for three years, creating one prototype after another, and step by step, the HEAD ski came to life.

With its plywood core, aluminum sheets, plastic sidewalls, and a continuous steel edge, it was a revolution on the slopes. Suddenly anyone could ski and have fun at the same time.

And the rest, along with the competition, was history.

That's the problem with brilliant engineering: it only makes itself apparent when the ski disappears beneath you. It's the problem with incredible design: a boot can be so sublimely comfortable that you can totally focus on other things - like the finish line. And it's the burden of every athlete - the faster they go, the easier they make it look. At HEAD, we're inspired by those who push themselves, drive the sport, and create solutions. And if you ever get to visit our headquarters, you may find that we're inspired pretty much all the time - because we're surrounded by those people every day.

So we'd like to take a moment to say thanks to every staff member and all our athletes. Together, you're pushing the industry forward, and inspiring more and more people to put on skis and discover this beautiful sport. And every time we ask you What's your limit? The answer only opens another question,

What limit?.

BEHIND THE SCENES

IT'S EASY TO LOOK AT A SKI OR A BOOT AND FORGET ABOUT THE WORK THAT WENT INTO IT.

WHEN YOU'VE SEEN THE SPEED OF LIGHT

A hundredth of a second isn't the difference between first and second, it's the difference between winning and nothing at all. If you race, you understand. A centimeter is the grandest of canyons, and there's no such thing as fast enough. But thanks to our athletes and their insatiable demand for more speed, better speed, and faster speed, we're all going a lot quicker.

This is trickle-down technology at its finest. Though anything that fast could hardly be called a trickle.

WHEN YOU'VE SEEN
THE SPEED OF LIGHT
WHEN YOU LIVE ON THE EDGE
WHEN ADRENALIN
IS YOUR ONLY FUEL
WHEN YOU ARE THE ONLY
OPPONENT TO BEAT

WHAT'S YOUR LIMIT?

RACE combo

WHEN SLOWING DOWN IS A WASTE OF TIME

Winter can't come fast enough and never lasts long enough. Likewise, no run is fast enough or lasts long enough. But with snow on the ground and the right equipment at your feet (and everywhere else), there is bliss around each turn, and satisfaction at the end of every run.

And during those magical, powdery months, there is no limit to how hard we will push ourselves to make the most of every moment. Is it winter yet? How about now?

WHEN SLOWING DOWN
IS A WASTE OF TIME
WHEN YOU LIVE LIFE TO THE
FULLEST SPEED
WHEN YOU TURN
FEAR INTO TENACITY
WHEN YOU ARE USED
TO USING THE FAST LANE

WHAT'S YOUR LIMIT?

PERFORMANCE Combo

WHEN YOU ENJOY EVERY TERRAIN

Specialization is the mother of progress. Every season, specialized freeriders are going bigger and specialized racers are going faster on specialized equipment and specialized terrain. On the other hand, specialization kills freedom. The freedom to decide in the middle of the chair lift ride, whether you're going to race down the front or freeride down the back of the mountain.

The freedom to pull out of a multiple-G-turn and veer to the left into a virgin couloir. The freedom to go for one last full speed run on twilight ice as the sun sets behind the peaks you've ridden.

**WHEN YOU ENJOY
EVERY TERRAIN
WHEN THE IDEALS
ARE THE ONLY
THING YOU FOLLOW
WHEN YOU LOOK BEYOND
THE HORIZON AND
THEN GO TO SKI THERE
WHEN FOCUS CONQUERS FEAR**

WHAT'S YOUR LIMIT?

ALLRIDE combo

WHEN YOU GET OUT OF LINE TO FIND YOUR OWN

There is a mindset that fits into the crowd, follows the path, and stays in the box. And then there's the personality who dies for the challenge and lives for freedom.

Those who see skiing as a test of skill, and sometimes of fate. Or as the ultimate form of expression.

In man-made, in natural, and sometimes super-natural terrain. Freeriding and freestyle are brothers from different mothers. So is their attitude. And so is our equipment.

WHEN YOU GET OUT OF
LINE TO FIND YOUR OWN
WHEN YOU SKI
WHAT OTHERS GOOGLE
WHEN YOU'RE SLAVE
ONLY TO FREEDOM
WHEN TIME STOPS
WHILE YOU FLY

WHAT'S YOUR LIMIT?

FREESKI Combo

WHEN EVERY TURN BRINGS A SMILE OF JOY?

True love for skiing is unconditional.

It's not about flawlessness, prettiness, or prowess. It's about expressing yourself, not impressing others. Faith moves mountains, confidence skis them - from daybreak until nightfall.

Whatever your line and your limit:

The right equipment will turn bad weather into good karma, terrible hair days into big air days, and I-don't want-to-run-days into ounces of pure, striking joy.

WHEN EVERY TURN BRINGS
A SMILE OF JOY
WHEN YOU FIND
THE PERFECT LINE
WHEN YOUR GEAR FINALLY
MEETS YOUR ASPIRATIONS
WHEN YOU TURN BAD
WEATHER INTO GOOD KARMA

WHAT'S YOUR LIMIT?

WOMEN combo

WINTER COLLECTION 2017-18

SKIS

HEAD[®]

KORE

A STORY OF INNOVATION AND DESIGN, LIGHTNESS AND STRENGTH, AND A NEW HORIZON FOR FREERIDE. LEADING WITH A SIMPLE CONCEPT THAT LINKS TO THE SKI'S USP AND RELATES DIRECTLY BACK TO OUR REASON FOR FREERIDING...
PURE FRESHLY FALLEN POWDER.

LIGHTNESS

The revolutionary construction has been topped with a polyester fleece instead of a standard top-sheet. This topless Tech construction results in the lightest ski in its category. The triaxle weave of its carbon layer provides additional torsional rigidity for supreme responsiveness and solid edge hold.

FLOTATION

The Graphene fused tip and tail allows us to reduce and redistribute weight throughout the ski. The thinner profile enhances flotation in soft snow and maximizes maneuverability.

CONTROL

While the shock absorbing Koroyd gives the skier precise control in variable terrain, the ski provides strong torsional stiffness and great stability.

INNOVATION IS ABOUT DISCOVERING WHAT IS TRULY NECESSARY. IT IS NOT A PROCESS OF ADDITION, BUT SELECTION. TAKE AWAY THE BAGGAGE, THE EXTRA WEIGHT.
LEAVE ONLY THE PUREST.
LEAVE ONLY THE CORE.

"clinically obese"

DIMENSIONS
145 - 117 - 129

RADIUS
24,6

LENGTH
180/189

KORE is the most technically sophisticated freeride ski we've ever made. Here's why:

GRAPHENE

GRAPHENE is the strongest, lightest material known to man. We fuse it into the KORE's tip and tail to make it lighter and more responsive in deep snow.

KOROYD

KOROYD is a honeycomb shaped material at the heart of the KORE. It's super-light and incredibly elastic. It's strong and flexible and what makes the KORE special.

KARUBA

KARUBA wood core is what gives the ski its pop and personality. It's the perfect ratio of density and weight. The advantages of combining Karuba, Koroyd, and Graphene enhance the ski, making it light and balanced.

WORLD CUP REBELS i.SL

SKI TECHNOLOGY KERS

THE EXTRA BOOST

KERS Technology works like a turbo charger that provides additional power and acceleration by stiffening the tail of the ski in outturns. The effect: a boost, catapulting the rider into the next turn. Just like when Formula 1 pilots push a button for that extra notch of Speed. HEAD KERS Technology is an electronic, fully automatic and integrated system.

TECHNICAL BACKGROUND

HEAD KERS Technology is an evolution of the idea behind HEAD's Intelligence™ Technology. But unlike Intelligence™, KERS does not influence the torsional stiffness of the ski, KERS empowers the skis' longitudinal flex. Also KERS Technology is based on a completely new chip capable of accumulating power and keeping it in store for the right moment. Piezoelectric fibers transform kinetic energy into electrical energy which is stored in the embedded chip in the ski. Electrical energy is immediately released to areas of the ski, where additional energy is requested by the sensor. Timing and release are automatically controlled and coordinated. Depending on the flex pattern of different ski models, sensors are programmed beforehand: the more aggressive the ski has to be, the stiffer the tail will become.

Skis experience maximum flex at the end of a turn. At this moment an active microchip releases energy into the fibers of the tail. The tail of the ski then stiffens up, immediately increasing rebound for maximum acceleration at the end of the outturn.

ELECTRONIC SKI MANAGEMENT SYSTEM

HEAD's theory of relativity: Ski performance is not an absolute measure. What you want out of a ski always depends on how and where you ride. On hard-packed slopes you want perfect edge grip. On soft snow, you want more maneuverability. Breaking the slope record you want your ski to perform differently than when you're just cruising with your friends or family. Adaptive HEAD Intelligence™ Technology helps your ski perform perfectly – both relative to terrain and your individual riding mode.

HOW IT WORKS

Intellifibers positioned at 45° in front of the binding transform mechanical impulses into electrical energy. The harder you ride, the more energy is produced. The electrical energy is led back to the Intellifibers. This causes them to stiffen up, putting more rebound and torsional stiffness into the ski.

WHAT IT DOES

Their 45° position in front of the binding increases the ski's torsional stiffness, pushing the edge into the snow in hard turns. Intelligence™ progressively stabilizes the entire ski at high speeds.

THE EXTRA BOOST

Some HEAD high-end skis boast Intelligence™ Chip Technology. Here, the electrical energy produced by the Intellifibers is not just recycled, but accumulated and released bit by bit through a pre-programmed chip – individually timed to match the oscillation properties of the ski. Thus, the effect of Intelligence™ is multiplied, providing even more performance relative to your skiing style.

JOY COLLECTION

THE SUPERLIGHT SKI THAT PACKS MORE ACTION AND JOY INTO YOUR DAY. THANKS TO GRAPHENE, THE WORLD'S LIGHTEST, THINNEST AND STRONGEST MATERIAL, SKIING WILL NO LONGER BE THE SAME. THIS REVOLUTIONARY MATERIAL ALLOWS FOR LIGHTER SKIS WITH UNPARALLELED BALANCE AND CONTROL, THAT WILL FILL YOUR DAY WITH JOY.

- 1 Top Sheet
- 2 Reinforced glass fiber
- 3 GRAPHENE
- 4 Carbon glass fiber
- 5 Koroyd
- 6 Wood Core
- 7 Sidewall
- 8 Dampening Layer
- 9 Edge
- 10 Carbon
- 11 Base

Light done right.

LIGHTNESS

THANKS TO THE LATEST SUPER LITE AND SUPER STRONG MATERIALS

True to HEAD's DNA, we remain on the forefront of ski technology. And now we are incredibly proud to introduce GRAPHENE – an incomparably light and unbelievably strong material. Layers of GRAPHENE, only a single atom thick, combine to make skis that flex and react intuitively to even the smallest inputs. When mixed with other lightweight materials like Koroyd and carbon, GRAPHENE enables weight savings of up to 350 grams.

BALANCE

THROUGH UNIQUE WEIGHT DISTRIBUTION PROFILES

With GRAPHENE we are able to manipulate the geometric profile and weight distribution of the ski in any way we like. Depending on the nature of the ski model, the type of skier, and the expected snow conditions, we fine-tune weight and flex distribution characteristics to optimize the skiing experience. Never before has a ski been more perfectly balanced or more efficient – in every model of the size run. In our new women's line, each ski's weight distribution is set up for one of two categories: "on-piste" and "off-piste".

CONTROL

WITH WOMEN'S CAMBER AND ERA 3.0

Thanks to GRAPHENE, our women's camber has a lower profile, which makes for easy turn completion and truly epic performance. And because the handling of the ERA 3.0 Rocker has been enhanced, it's not just the turns that are easier to execute – even changes from edge to edge are effortless. With GRAPHENE you always have grip and control – in every situation, through all conditions, with every move you make.

SUPERSHAPE

FEEL INNOVATION. WITH GRAPHENE EMBADDED IN THE SUPERSHAPE YOU WILL ENTER A NEW DIMENSION OF SKIING. THE UNIQUE CHARACTERISTICS OF THIS NOBEL PRICE WINNING MATERIAL ENABLES A TOTALLY DIFFERENT CONSTRUCTION OF OUR HIGH PERFORMANCE SKIS. PERFECT GRIP FROM THE FIRST RUN UNTIL THE LAST. ACCELERATE, STEER AND CHARGE AT ALL CONDITIONS BY PERFECT WEIGHT BALANCE DISTRIBUTION AND THEREFORE ACCURATE TURN INITIATION.

WC SANDWICH CAP CONSTRUCTION

- | | | |
|--------------------------|----------------------|-------------------|
| 1 Top Sheet | 2 Glass fiber fleece | 3 Titanal Layer |
| 4 Glass fiber | 5 Wood Core | 6 GRAPHENE |
| 7 Sidewall | 8 Edge | 9 Dampening Layer |
| 10 Reinforced Fiberglass | 11 Base | |

EFFORTLESS POWER

These skis have a core construction with a much larger woodcore. Due to the light-weight properties of GRAPHENE, we are able to use a thicker and wider aluminium sheet, which covers the entirety of the ski, ensuring a more reactive and powerful ride.

BALANCE

With GRAPHENE positioned in the center of the ski we have been able to reduce the thickness of the center and shift more material in the tip and tail, allowing for a ski with a truly harmonized flex distribution, easier engagement and quicker edge-to-edge changes.

CONTROL

Thanks to a thicker tip and tail it has been possible to design specific geometries for the four different shovels. Due to immediate effective edge, the ski is constantly in contact with the terrain no matter the angle.

i.Speed just wants to go faster. Clip in, hang on, and leave your comfort zone behind.

i.Rally can do it all, so get creative. There's no such thing as ice too hard, powder too soft, or turns too tight.

i.Magnum is a precision instrument for turning speed into pleasure. Go as fast as you want all day long.

i.Titan is a go-anywhere, shred-everything, multitasker. You'll need a snow cat to scrape the grin off your face.

SHOVEL ILLUSTRATIONS

A smaller shovel radius means the front contact area of the ski moves forward and engages faster into a turn.

MONSTER & INSTINCT COLLECTION

THESE SKIS HAVE GRAPHENE IN THEIR DNA. GRAPHENE IS THE THINNEST AND LIGHTEST ELEMENT EVER DISCOVERED BY MANKIND. GRAPHENE IS ALSO THE STRONGEST MATERIAL ON THE PLANET, STRONGER THAN DIAMOND AND 300 TIMES STRONGER THAN STEEL. HAVE NO FEAR, THESE SKIS WILL CHEW UP AND SPIT OUT ANY TERRAIN THAT COMES YOUR WAY.

REACTIVENESS

Thanks to GRAPHENE's lightness and strength, we are able to reduce common material like wood and glass fibres to add extra titanal layers, creating a ski with unique reactivity and responsiveness.

- | | | |
|--------------------------|----------------------|-------------------|
| 1 Top Sheet | 2 Glass fiber fleece | 3 Titanal Layer |
| 4 Glass fiber | 5 Wood Core | 6 GRAPHENE |
| 7 Sidewall | 8 Edge | 9 Dampening Layer |
| 10 Reinforced Fiberglass | 11 Base | |

Without Graphene each ski would have 300 gramms more of material to endure the force of the titanal layers.

BALANCE

Thanks to GRAPHENE we are able to modify the balance properties of the ski to optimize the skiing experience on all terrains. The ski configurations can vary between Allride and Off-Piste.

OFF-PISTE BALANCE

ALLRIDE BALANCE

CONTROL

Thanks to GRAPHENE, our camber has a lower profile, which makes for easy turn completion and truly epic performance. And because the handling of the ERA 3.0 Rocker has been enhanced, it's not just the turns that are easier to execute – even changes from edge to edge are effortless. With GRAPHENE you always have grip and control – in every situation, through all conditions, with every move you make.

SKIS TECHNOLOGY | GRAPHENE CORES SUPERSHAPE/MONSTER/INSTINCT

WC SANDWICH CAP CONSTRUCTION

Developed with the most sophisticated material known to man. The Graphene WC sandwich Cap construction, is developed with the most sophisticated material known to man. The Graphene WC Sandwich Cap Construction with a balanced mix of light Graphene and extra titanal layers, the ski combines the most extreme agility with extreme responsiveness, the ultimate performance.

- | | | |
|--------------------------|----------------------|-------------------|
| 1 Top Sheet | 2 Glass fiber fleece | 3 Titanal Layer |
| 4 Glass fiber | 5 Wood Core | 6 GRAPHENE |
| 7 Sidewall | 8 Edge | 9 Dampening Layer |
| 10 Reinforced Fiberglass | 11 Base | |

POWER SIDEWALL TI JACKET CONSTRUCTION

The Titanal layer in combination with the Graphene, creates a solid and responsive performance ski. The synthetic injected core supported with ABS sidewalls allows for a soft longitudinal flex coupled with super responsive torsional flex, thanks to the sidewall jacket.

- | | | |
|-------------------------|------------------|------------|
| 1 Top Sheet | 2 Glass fiber | 3 GRAPHENE |
| 4 Diagonal Glass fibers | 5 Synthetic Core | 6 Sidewall |
| 7 Edge | 8 Titanal | 9 Base |

SUPERLITE POWER SIDEWALL JACKET CONSTRUCTION

A synthetic injected core supported with ABS sidewalls. This superlite construction thanks to GRAPHENE allows for a soft longitudinal flex coupled with a super responsive torsional flex, thanks to the sidewall jacket.

- | | | |
|------------------------|--------------------------|------------|
| 1 Top Sheet | 2 Glass fiber | 3 GRAPHENE |
| 4 Diagonal glass fiber | 5 Synthetic core | 6 Sidewall |
| 7 Edge | 8 Perforated steel layer | 9 Base |

SKIS TECHNOLOGY | GRAPHENE CORES WOMEN SPECIFIC CORES

GKC SUPERLITE SANDWICH CAP CONSTRUCTION

Developed with the most sophisticated material known to man, the Superlite sandwich construction uses Graphene, KORROYD and CARBON to guarantee the lightest ski in the world without compromising on performance. The ultimate construction for a high performing women ski.

- | | | |
|----------------------|--------------------------|-------------|
| 1 Top Sheet | 2 Reinforced glass fiber | 3 GRAPHENE |
| 4 Carbon glass fiber | 5 Koroyd | 6 Wood core |
| 7 Sidewall | 8 Dampening Layer | 9 Edge |
| 10 Carbon | 11 Base | |

SUPERLITE SANDWICH CAP CONSTRUCTION

Thanks to the unique properties of Graphene, the Superlite Sandwich Cap Construction has had a reduction in the materials inserted with an increase in its responsiveness, allowing faster and more precise change from edge to edge. The ultimate ski for flotation and responsiveness.

- | | | |
|-------------|------------------------|--------------------------|
| 1 Top Sheet | 2 Glass fiber fleece | 3 Glass fiber |
| 4 Graphene | 5 Dampening Layer | 6 Wood core |
| 7 Sidewall | 8 Diagonal glass fiber | 9 Reinforced glass fiber |
| 10 Edge | 11 Base | |

SUPERLITE POWER SIDEWALL JACKET COMPOSITE CORE

To make this construction even lighter, material from the heart has been replaced by a lighter material and a layer of Graphene has been inserted to not only insure the performance is unchanged but actually increased, as the overall thickness of the core is reduced, making it a composite that is easy and forgiving, but always precise.

- | | | |
|------------------------|------------------|--------------------------|
| 1 Top Sheet | 2 Glass fiber | 3 Graphene |
| 4 Diagonal glass fiber | 5 Synthetic core | 6 Lite core |
| 7 Sidewall | 8 Edge | 9 Reinforced glass fiber |
| 10 Base | | |

SKIS TECHNOLOGY | HEAD CORE

WC SANDWICH CAP CONSTRUCTION

A wood core sandwich construction with Titanal which combines the solid and responsive performance of the vertically laminated wood core and control offered by the Titanal. Upper layer wrapped by Cap that insures longer durability.

WOOD CORE CAP CONSTRUCTION

A vertically laminated wood core surrounded by a sock of fiberglass and the whole body is wrapped by a durable topsheet. This forgiving construction is ideal for ramping up the learning curve.

SANDWICH CAP CONSTRUCTION

Is the world cup sandwich construction with a Cap that wraps over the top edge of the sidewall to make the ski more suitable for all mountain skiing.

POWER SIDEWALL JACKET

A synthetic injected core supported with ABS sidewalls. This lightweight construction allows for a soft longitudinal flex coupled with a super responsive torsional flex, thanks to the sidewall jacket.

Rocker done right.

01

ALLRIDE ROCKER

A rocker who feels comfortable on the steepest slopes and deepest pow - made for skiers who feel comfortable on steepest slopes and deepest pow, and who are always ready to make the best out of every single skiing day. Allride Rocker enables superior steering and increased floatation. We place exactly the right amount of rocker in each model to ensure maximum performance for all ability levels. Steering is easier for all skiers and soft snow versatility is enhanced.

02

PNP ROCKER

Some people want to fly high - if you're one of them, be sure your ski features the PNP Rocker. Consider it a pair of wings for skis, developed in the HEAD freestyle laboratory. Our Park & Pipe Rocker incorporates tip and tail rise with regular camber underfoot. PNP gives skis a significant amount of pop and energy for boosting tricks. So dive in, go bigger, fly further, and rock the park and pipe as hard as you can.

03

SPEED ROCKER

For perfect handling on hardpack - a slight tip rise on a ski with standard camber which means great performance, easy turn initiation, and high versatility on soft snow. 10% rocker and 90% camber is just enough to take the sting out of the edges, while keeping the bite you need to turn. Speed Rocker turns HEAD performance skis into a weapon of speed with power steering. It's fast. Are you?

04

TNT ROCKER

For more powerful freeriding - Tip & Tail Rise meet partial camber! The recipe for great float and freedom in powder with enough standing power to enjoy those days you didn't pray for snow. Really the best of both worlds. 40% Rocker is radical enough to satisfy the freerider's soul. 60% Camber helps keep your speed and your budget in check - because with the versatility of TNT rocker, you'll have to buy one less ski for your quiver.

05

JUNIOR ROCKER

For perfect allride performance. Kids don't like compromises. But they don't like sticking to decisions either. One day they're a rockstar. And the next day they want to be a bunny. With 20% rocker and 80% camber, kids get tons of float, easy turn initiation, and plenty of speed and control. HEAD's Junior Rocker simply works for anyone, anywhere.

SKIS TECHNOLOGY | ERA 3.0

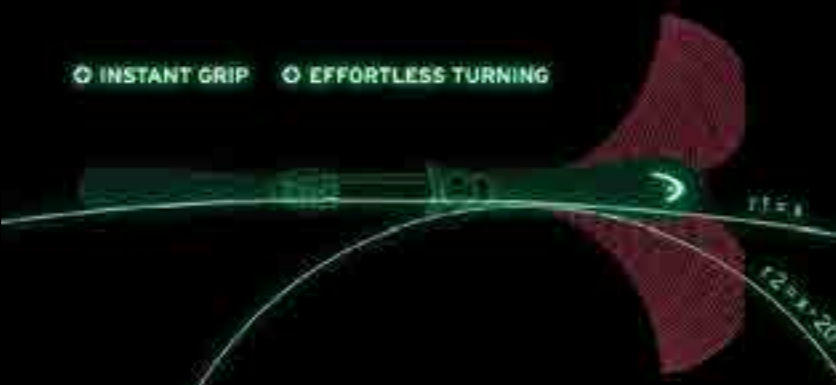

ERA 3.0

Imagine a ski that performs for everyone, anywhere: One for all. All in one. HEAD ERA 3.0 is not your one-dimensional «Have a problem? We fix it!» technology. ERA 3.0 is a combination of technologies, shape and geometry. Think Rocker, think Radius, think Rebound. Think 3-dimensional.

ALLRIDE ROCKER

For superior steering and increased floatation. We place a highly targeted amount of rocker in each model to ensure maximum performance for all ability levels. Steering is easier for all skiers and soft snow versatility is enhanced.

PROGRESSIVE RADIUS

For tremendous turning. Regular rocker makes skiers place their ski further on edge to have it touch from tip-to-tail. With progressive radius, up to 50 % less angulation is needed to enjoy full edge contact. More edge on the snow = more edge grip.

INTELLIRISE REBOUND

For targeted stability. We move our legendary piezoelectric Intellifibers to the tip of the ski. The nasty tip vibrations found on regular rockers are not found here. These skis are too smart for that.

ERA 2.0

THE LITTLE BROTHER OF ERA 3.0. It is everything ERA 3.0 has to offer as far as design, performance and geome-

try integration, but without the addition of "Rebound" with its piezoelectric Intellifibers. While we do want to see kids

experience skiing performance at the highest level, they should have the best possible tools to learn and perform.

SKIS TECHNOLOGY | FRAMEWALL

FRAMEWALL

The extraordinary stressing of Park&Pipe skis generally result in fast abrasion and easy chipping of the top sheet. This problem has been solved by the all new FRAMEWALL. The three dimensional build of the side-walls covers the skis top sheet and prevents it from chipping and other external hazards, which results in delamination. The FRAMEWALL is the first 360 protector on a ski, that increases the skis durability and performance considerably!

FREEFLEX EVO

Freeflex EVO reduces the impact on the natural ski flex to a minimum. Decreased forward pressure, completely redesigned new roller pincer systems and wings, plus an intelligent gliding element all add up to the rEVolution of racing: fastest time, from the starting gate to the finish line with Freeflex EVO.

LOWER WEIGHT - MORE FUN

What is ideal: a lower weight or improved safety? This question is a thing of the past when it comes to choosing the perfect touring binding. Tyrolia's new AAmbition AT binding combines both desired features by using the high tech material Carbon© in the mid part of the binding. Constant stability at a significantly reduced binding weight (200g) make the Tyrolia AAmbition Carbon an AT binding with proven downhill performance and safety features. Its benefits of very low weight are highly valued when hiking and touring the back country.

Available in 3 Lengths: SHORT (265-295mm), MEDIUM (295-325mm) and LONG (315-345mm).

BOOTS

WINTER COLLECTION 2017-18

HEAD[®]

POWER EFFICIENT DESIGN

Better skiing
with less effort

The HEAD design concept is inspired by the obsession to make skiing more fun, easier while using and with less energy. This is obtained by a naturally centered, and balanced stance, combined with a structure that maximizes the energy transmission to the skis.

Hi-Top Tech

Direct contact between leg and shell provides the maximum energy transmission and ski control.

Duo Flex

The Duo Flex drivers enable a progressive and reactive flex with precise ski control through all phases of the turn.

Control Frame

An innovative profile and two different materials provide a perfect synthesis of comfort and rearward support, and energy transmission.

FEEL THE ADVANTEDGE

5° 30% More power transfer
40% More reactivity & rebound

AdvantEdge Boots

With as little as 5° a forward flex skier starts transmitting a tremendous amount of power to the ski while maintaining confidence and control.

Conventional Boots

A conventionally constructed boot requires a minimum flex of 10° to transmit energy, with slower transmission between the cuff and shell.

Super Easy Entry

Hi Top tech provides the easiest hand entry and exit and prevents foot pinching by holding the boot tongue in the correct position inside the boot.

FORMED TO YOUR FOOT

100% CUSTOMIZABLE FIT SYSTEM

FORM FIT

New FormFit plastics formulas hold stretches better than ever before for a perfect comfort with improved balance and control.

PERFECT FIT is the new revolutionary system that ensures comfortable, performances-oriented customization in HEAD's superb ski boots.

HOW DOES IT WORK?

THE NEW HEAD SOLES FOR VECTOR EVO AND ADVANT EDGE

High-profiled slip-resistant sole

Increased walking comfort and improved natural roll thanks to a curved rubber sole

GRIP WALK

GRIP WALK cod. 60120015

No height adjustment needed for specific Grip Walk binding

GRIPWALK. COMPATIBLE WITH:
 - Alpine ski bindings with the additional Gripwalk marking
 - Bindings that accept alpine touring boots according to ISO 9523

WALK SOLE

WALK SOLE cod. 60119545

WALK SOLE. COMPATIBLE WITH:
 - Alpine ski bindings which are marked to work with Walk Soles or Walk To Ride soles
 - Bindings that accept alpine touring boots according to ISO 9523

HEAD CANTING SYSTEM

BOOT COMPATIBILITY:
 Compatible with VECTOR EVO and ADVANTEDGE

Cod. 60119552

HEAD offers the following solutions:

- 2,0°
- 1,5°
- 1,0°
- 0,5°

BOOT TECHNOLOGY / RAPTOR, VECTOR EVO AND CHALLENGER

SPINEFLEX BUCKLES

Spineflex is a revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile and thus provide a homogeneous foot wrapping

independent from the degree of closure. The increased precision and comfort created from the absence of pressure points results in better performance.

BOOT TECHNOLOGY / VECTOR EVO AND CHALLENGER

DOUBLE POWER SPINEFLEX BUCKLES

Spineflex is a revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile and thus provide a homogeneous foot wrapping independent from the degree of closure.

The increased precision and comfort created from the absence of pressure points results in better performance. The ergonomic, patented Double Power lever increases the leverage of the buckle by 50%, halving the effort required to buckle in. constant release values.

BOOT TECHNOLOGY / CHALLENGER, VECTOR EVO, ADVANT EDGE, EDGE AND CUBE

SUPERMACRO TOOTHPLATE

With a push of a simple button, the ratchet provides a 28 mm range of adjustment granting to fit any leg.

BOOT TECHNOLOGY / CHALLENGER

ADAPTIVE FIT TECHNOLOGY

Adaptive Fit Technology is the first and only ski boot technology that lets you change the width of your boot from a comfort/ performance last to a precision/performance last with the turn of a screw.

BOOT TECHNOLOGY / RAPTOR, VECTOR EVO, CHALLENGER, ADVANT EDGE

DOUBLE POWER BOOSTER VELCRO

The strap of the Double Power Booster Velcro works as a double pulley for better closure and a tighter wrapping on the cuff. The elastic Booster Strap allows more dynamical response of the boot. The result: more precise transmission and faster ski reaction. (Manufactured under license from Skimatrix Ltd.)

Protected under one or more of the following:

European patent N. 1087676,

US patent N. 6.026.594 Canadian patent N. 2.335.698,

Other patents pending.

BOOT TECHNOLOGY / VECTOR EVO

DYNAMIC FRAME SHELL

POWER EFFICIENT DESIGN: BETTER SKIING WITH LESS EFFORT

Modern skiing requires comfort, efficiency, and control. HEAD's new EVO Frame is built around the legendary Vector last, but features a new highly efficient Dynamic frame which directs 80% of the energy directed from the body toward the rear of the shell.

Forefoot area is less subjected to mechanical stresses but needs to provide the feeling on the snow. The Dynamic Frame has been designed to obtain the best sensitivity and the dynamic response of the boot sole when the ski is flexing.

EVO STANCE

BOOT TECHNOLOGY / HAMMER, THRASHER

TRIAD ERGOTECH SHELL

The innovative three piece construction, "Triad Ergotech Shell", provides precision and performance in any terrain and snow condition.

The boots progressive and natural flex is provided by the open throat shell, in addition to the interchangeable tongue and pivot point. The pivot point is placed where the ankle flexes at the rotating point of the shell.

4 CLOSING POINTS

Precise and effective foot retention with maximum performance through improved balance and control.

ERGO STANCE

360 FULL CUSHIONING SYSTEM

An innovative system that help to absorb any impact:

- Gel Shin Saver
- Rear spoiler
- Canting
- New toe box material to avoid toe bang
- Footbed and wedge

BOOT TECHNOLOGY / CUBE

EASY AS 1, 2, 3. DEVELOPING OUR CUBE3 LINE, WE DECIDED TO TACKLE THE ONE CHALLENGE EVERY SKIER FACES EVERY DAY ON THE MOUNTAIN: TO COMBINE GREAT SKIING PERFORMANCE WITH GREAT WALKING PERFORMANCE. AFTER ALL, ON ANY GIVEN DAY, WE SPEND UP TO 30% OF OUR TIME OUTSIDE OF THE BINDING.

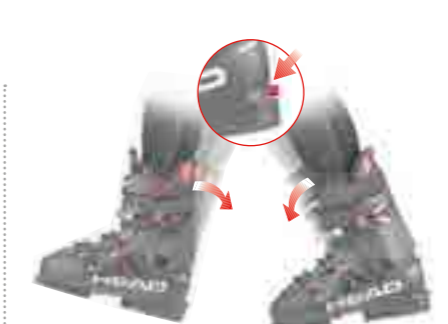

EASY IN

Thanks to a new quick entry geometry, the Cube3 is extremely easy to get into. Simply tilt back the shaft and step in. In addition, the 3-buckle construction with an oversized top buckle allows easy and quick buckling in and a great, snug fit.

EASY WALK

Outside of the binding, the shaft of the Cube3 is always unlocked, allowing natural walking. This, in combination with (patented) SoftWalk heel and grip system on the heel, makes the Cube a superb walking boot.

EASY SKI

The moment you step into your binding the patented integrated AutoSkiWalk mechanism blocks the shaft, allowing you to speed off down the mountain without bowing, bending or buckling.

WINTER COLLECTION 2017-18

BINDINGS

HEAD®

/AAAttack² TECHNOLOGY/

Skiers prefer equipment which provides control, performance and usability. Not only for open slopes and untracked powder areas, also for stoked park and half pipe rides. The TYROLIA AAAttack² reaches the next stage in combining functionality and modern design to meet these demands. A perfect tool for all-around skiers who are willing to attack!

THE NEW FR PRO² TOE

The next level to Access All Areas is reached with the new AAAttack² bindings. A new toe construction extends the possibilities of allmountain skiing: The new standard toe construction in the AAAttack² line - FR PRO² - is compatible with Alpine and GripWalk ski boots. The super secure 77mm metal Anti Friction Device - AFD Metal - can be adjusted to Alpine Boots (Type A ISO 5355) and GripWalk Boots.

GW: suitable for Alpine (A) and GripWalk (GW) Ski Boots

The AAAttack² 14 AT and the AAAttack² DEMO models can be adjusted for Alpine and Touring (T) ski boots, including GripWalk (GW), Walk Sole and Walk To Ride (W) ski boots. With these bindings, boot-binding compatibility issues during demo or in rental become things of the past.

AT: suitable for Alpine (A) and Touring (T) ski boots, including GripWalk (GW), Walk Sole and Walk To Ride (W) ski boots.

Basically, there is an ideal binding model within the AAAttack² line to fit your ski boot. (see p. 88/89)

SAFETY FIRST

To increase the safety and performance aspect of the new AAAttack² bindings, a new release kinematic was developed to reduce friction and guarantee more constant release values. The interaction between the spring and tension element is designed as new system which significantly reduces friction for even more precise and constant release values.

The top models, AAAttack² 18X GW and AAAttack² 16 GW feature the Race Pro Heel with a reduced stand height of only 17mm. The AAAttack² 13 and 12 have the lighter Race Heel. The AAAttack² 11 models feature a modified solid SX Heel construction and reduced weight for optimal allmountain performance.

PERFECT INDIVIDUALITY

These fired up allmountain binding models are available in different DIN settings for different demands. With regards to their clear design and compact measurements, the AAAttack models can be used on skis from 80mm widths onwards. Some models are available without brakes. This gives riders the opportunity to customize the setup to their needs. Brakes are available in different widths: 85/95/110/130/150mm.

Whatever you want - freeski, powder, park, pipe, slope - the tool to access all areas.

ADVANTAGES OF ADJUSTING THE AFD

Adjusting the height of the AFD according to your ski boot sole height has many advantages for your customer and your shop/fleet:

- 1 Exact adaptation of boot-binding system
- 2 Better performance on skis
- 3 Precise release values and re-centering of the boot
- 4 More precise values at the pre-season and in-season inspections and less deficient products

TECHBOX CARBON

LOWER WEIGHT - MORE FUN

What is ideal: a a lower weight or improved safety? This question is a thing of the past when it comes to choosing the perfect touring binding. Tyrolia's AAAMBITION 12 AT CARBON binding combines both desired features by using the high tech material Carbon® in the mid part of the binding. Constant stability at a significantly reduced binding weight (200g) make the Tyrolia AAAmbition Carbon an AT binding with proven downhill performance and safety features. Its benefits of very low weight are highly valued when hiking and touring the back country.

Available in 3 Lengths: SHORT (265-295mm), MEDIUM (295-325mm) and LONG (315-345mm).

AAADRENALIN 16 AT SHORT / LONG

For a stable, versatile freeride experience with direct power transfer choose the AAAdrenalin 16 AT – a revolution in freeski bindings, combining outstanding downhill performance with an ergonomic walking mechanism for short hikes. Fits Alpine (ISO 5355) and Touring Ski Boots (ISO 9523). Short for Boot Sole Lengths from 270-330mm, Long for Boot Sole Lengths from 300-360mm.

TECHBOX MBS

MBS - MULTI BOOT STANDARD

MBS - the only mass market feature with easy adjustment to different boot sole heights from Alpine & GripWalk to Walk Sole and Walk To Ride ski boots.

Within the 2017.18 PowerRail line, TYROLIA introduces 2 new models with a unique feature for the mass performance segment: MBS - Multi Boot Standard. These models are suitable for Alpine (ISO 5355), GripWalk and Walk Sole/Walk To Ride ski boots.

Adjustment is simple and easy: only two different positions (position 1 - Alpine/GripWalk and position 2 - Walk Sole/Walk To Ride) are marked on the binding toe. Alter the marked position by turning with a screwdriver. No further adjustments or fine tuning with a paper strip are necessary. Done!
The ideal solution for multiple boot sole types, even for busy on-snow demos or rentals!

Position 1
GRIP WALK Alpine, GripWalk (pre-set position)

Position 2
WALK SOLE/WALK TO RIDE Walk Sole/Walk To Ride ski boots

AMBITION

THE TOURING BINDING

The TYROLIA AAAmbition Alpine Touring binding is the perfect companion for all Alpine Touring Aficionados so that no terrain remains unattainable. We included every attribute of our high-performance alpine ski bindings in this Alpine Touring binding.

ALPINE TOURING TOE

This Alpine Touring Binding features the exclusive TYROLIA Alpine Touring (AT) Toe which can be easily adjusted to alpine and touring boot norms. A 65 mm wide mechanical AFS gliding element secures constant release values also with rubber soles. In combination with two rollers this binding provides superior safety features with the rapid and exact boot re-centering that skiers expect from TYROLIA. As a result of its harmonious design, the TYROLIA AAAmbition has a wider contact area which improves stability and provides a secure foundation for every skiing situation. Furthermore, its pivot is efficiently positioned right below the ski boot tip to ensure perfect force transmission and a tilt up to 90 degrees.

EASY ADJUSTABLE TELESCOPIC TUBE

Additionally the AAAmbition features a unique light-weight telescopic tube which offers an easy adjustment opportunity to different boot sole lengths. Thus, with only one binding model it is possible to cover the entire range of different sole lengths - from 260mm up to 350mm. Furthermore, with the setting of the telescopic tube and through the compact mounting, perfect binding positioning on your skis is improved and mid-point deviation is avoided.

TYROLIA FREEFLEX

The TYROLIA approved Freeflex System, which interacts with the AT Toe, the telescopic tube and the AT Heel, offers natural dynamics, excellent downhill performance and therefore a supreme ski touring experience.

ALPINE TOURING HEEL AND CLIMBING AID

The state-of-the-art designed climbing aid is positioned as close as possible to the Alpine Touring (AT) Heel. This provides better walking balance and effortless climbing in all situations. The low stand height of 38 mm improves stability and offers a confident stance. With four different climbing aid positions (climbing in a 0°, 5°, 10° or 15° position) it is possible to adapt on different terrains without stepping out of the binding. It does not matter if it is a walk through flat terrain or a steep slope up to the summit. Simply use the ski pole in order to change the climbing aid position and also to lock for the downhill ride.

CRAMPONS

Additional crampons are available as spare parts in widths of 90 mm, 105 mm and 120 mm, and provide safe climbing and a secure stand in any situation.

- 90 mm: A. No.: 163006 (1 pair)
- 105 mm: A. No.: 163007 (1 pair)
- 120 mm: A. No.: 163008 (1 pair)

DEMO AND RENTAL SUITABLE

In order to offer ambitious sportsmen an opportunity to widen their horizons, the TYROLIA AAAmbition is also demo and rental suitable: Combined with a spare demo track, the TYROLIA AAAmbition Alpine Touring binding can be tested and shown to a broad audience. Only two easy adjustments (one on the telescopic tube and one on the demo track) are required to fit to different boot lengths without extra drilling. A. No: 163001

BRAKES & INDIVIDUALITY

Considering the different ski widths, the TYROLIA AAAmbition comes without brakes. This gives you the opportunity to either choose the perfect fitting brake out of four different widths (85 mm/95 mm/105 mm/125 mm) or simply to ride and hike without brakes using appropriate powder straps - TYROLIA AAA-Series Powder Strap (1 pair): A. No.: 162981. Additionally available: TYROLIA AAA-Series Powdercord - A.No.: 163025

To sum up: The TYROLIA AAAmbition Alpine Touring binding is what every ski touring fanatic was looking for. On one hand it offers freedom and individual adjustment possibilities and on the other hand it provides the premium high-end performance that is expected from the world market leader TYROLIA. The solid, light-weight construction and its maximum functionality enhances the ultimate mountain experience for ambitious climbers as well as for touring newbies. Overcome boundaries - Simply just: Access All Areas!

DRENALIN

THE PERFECT ALL-AROUNDER

With the AAAadrenalin Freeride binding from TYROLIA, no terrain is out of reach. This binding provides a level of skiing performance never before seen in an alpine binding. It combines performance driven freeride features with the ultimate ergonomic walking mechanism for maximum freedom on- and off-piste. Overcome boundaries smoothly for a perfect ride.

The TYROLIA AAAadrenalin binding is a perfect option for freeriders who prefer precise downhill control combined with ideal mechanics for short walks to reach untouched paths for a memorable ski experience. Designed together with freeskiers and backcountry skiers, this member of the TYROLIA AAA-Series is designed for ski widths from 80 mm and wider. The TYROLIA AAAadrenalin brings paramount freeride performance in every terrain, on every slope.

FREERIDE (FR) PRO TOE

The TYROLIA AAAadrenalin comes with the Freeride (FR) Pro Toe with its ergonomic pivot position for optimal tilt up movement up to 90 degrees. This system provides effortless walking over short distances.

The FR Pro Toe is adjustable by changing the position of the Anti-Friction-Slider (AFS Metal) to cover alpine and touring boot norms. This 68 mm wide slider plus a stainless steel gliding element provide constant release values and result in a broader contact area to the ski boot sole.

The benefits: more stability, more direct power transmission and an ultimate skiing performance.

← 60mm →

FREERIDE (FR) PRO HEEL

The ultra-wide 80 mm heel track makes all the performance difference needed to take this product over the top. Extra width and the superior kinematics of TYROLIA's high performance bindings make it absolutely stable and reliable for perfect force transmission and unmatched performance. The heel can easily be adjusted to different boot sole lengths without any additional tools.

It covers a wide range of seven ski boot sizes. The TYROLIA AAAadrenalin Freeride binding is available in two lengths:

- SHORT (S) for ski boot sole length of 270–330 mm
- LONG (L) for ski boot sole length of 300–360 mm

← 60mm →

AAA-ASCENDER LOCK AND CLIMBING AID

To Access All Areas, transition from skiing to hiking is incredibly fast, easy and convenient. Simply use the tip of the ski pole without stepping out of the binding to move the highly visible Ascender Lock to change between hiking and ski mode.

Another TYROLIA feature is the possibility to walk in the 0° position. After release, TYROLIA's climbing aid can easily be operated with a ski pole and it can be positioned in three different angles (0°, 7° and 13°) for an optimal walking position. This improves balance and a secure stand on your way to perfect skiing spots.

CRAMPONS

Additionally, TYROLIA crampons (available as spare parts in three widths: 90 mm, 105 mm and 120 mm) can be mounted to improve grip in steep and icy terrain.

- 90 mm: A. No.: 162977 (1 pair)
- 105 mm: A. No.: 162978 (1 pair)
- 120 mm: A. No.: 162979 (1 pair)

Whether skiing downhill or bridging walking paths, the TYROLIA AAAadrenalin Freeride binding gives adventures an unrivaled combination of skiing performance and all terrain versatility, providing easy Access to All Areas!

FREEFLEX

The platform of TYROLIA's AAAadrenalin binding provides the approved TYROLIA Freeflex function which allows the ski to flex as it is designed to do so it can retain its natural dynamics. Freeflex is enabled by the free gliding plate that runs within the titanal heel track and is supported by the center of rotation of the binding toe.

BRAKES & INDIVIDUALITY

The TYROLIA AAAadrenalin comes without brakes. This gives each freeriders the chance to choose the precisely fitting brakes with regard to the ski widths. The TYROLIA AAAadrenalin bindings can be combined with brake widths of 85/95/110/130 [F] or 95/110/130 [B]

Additionally available:
TYROLIA AAA-Series Powdercord – Art. No.:163025

PROTECTION

WINTER COLLECTION 2017-18

HEAD[®]

SAFETY

Our helmets fulfill highest safety standards for ski & snowboard helmets, taking into account the results of collision tests to ascertain qualities of puncture resistant dampening and puncture. This is why some of the world's best athletes are trusting our products.

FIT

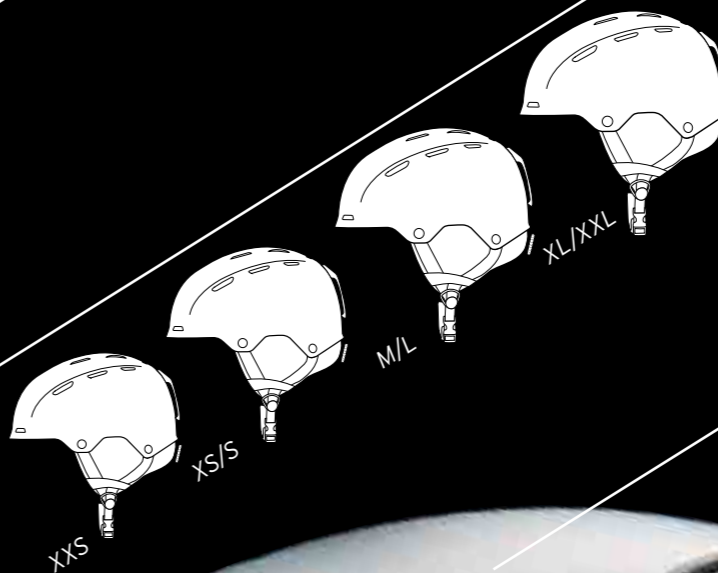

The perfect fit of a helmet is vital to fulfill its protective purpose. To assure a perfect fit, we teamed up with BOA. Their accurate size adjustment system combined with HEAD's liner technology adapts the helmet's fit to individual head shapes. For a comfortable fit and a maximum level of protection.

COMFORT

The soft material of our liners adapts perfectly to the head and thus avoids any bruises and the unpleasant entering of cold air. Molded-in mesh zones let heat and moisture escape to the outside and, together with the ventilation system, ensure a comfortable head climate. The innovative Cantilever feature ensures a wrinkle-free size adjustment, adding extra comfort and increased fit.

HELMETS TECHNOLOGY

4 SIZES

The all-new T-Series comes in four sizes, all featuring their own specific shell mold. This is especially important on smaller sizes, where weight and fit is crucial to assure the protective qualities of a helmet.

TECHBOX VISOR

HEAD Visor Construction is a wind-sealed UV protective shield that allows skiers to ride wearing prescription glasses. Like on a motorcycle helmet the visor can be pulled down to protect the eyes while riding.

As for goggles, Visors are available in different categories, depending on the according weather conditions: S3 for bright and sunny days, S2 for changing conditions and S1 for cloudy or snowy days.

GOGGLES

WINTER COLLECTION 2017-18

HEAD[®]

SCRATCH RESISTANT
 TVT lenses are highly scratch resistant. This is achieved by applying the mirror coating ① on the inside of the contrast enhancing TVT polycarbonate lens ②.

TVT TECHNOLOGY
 PERFECT VISION. FOR LONGER

LENSE SHAPES

CYLINDRICAL
 The Cylindrical Lens is a flat lens with a single lateral curve that provides a superior field of vision. It also looks great!

TORIC
 Toric lenses are curved in a way which avoids optical distortion, for the most accurate vision.

GREEN

RED

RELAX

Green lens tints have a harmonizing, regenerating effect on our mood. Compared to other lens colors, green is less affecting our visual perception, but helping to increase our vision especially in bright light conditions, as it homogeneously tones down the visible light spectrum.

This makes it the perfect option for a relaxed day on snow.

ACTION

Red lenses help to focus on the essentials when in action. The red lens tint mainly blocks the blue frequencies of the visible light spectrum, focusing on the yellow and red spectral areas. In snowy surroundings, this is resulting in an increased perception of contrast.

The red lens tint is the perfect choice when the action is on.

CONFIGURATOR

1. SHAPE

Cylindrical vs. toric, bold vs. slim - selecting the right shape is important for proper function and look of your goggle.

FUNCTION

Packed with features for high demand and regular use. Quick lens exchange system, triple layer form and lots of spare lens options.

HORIZON

GLOBE

FASHION

Contemporary goggle design for recreational skiers and riders. Lots of style meets everyday comfort.

INFINITY

GALACTIC

BUDGET

For the occasional winter sports enthusiast. Featuring everything you need for the days on snow, so why pay for more.

STREAM

SOLAR

2. VISION

Changing weather situations demand for a variety of lens tones - perfect vision for every condition.

S3

Bright and sunny conditions require a dimming lens tone.

SMOKE

Bluebird? The dimming smoke lens is your choice.

GREEN

For bright & sunny conditions when some additional contrast is needed.

S2

Versatile lens for changeable weather conditions.

BROWN

Brown lenses are the most versatile lenses for every condition.

TVT green

TVT is HEAD's take on contrast enhancing lense technology

TVT red

S1

For cloudy or snowy days on the mountain.

ORANGE

Orange lenses are perfect for over-cast conditions.

3. COATING

From a basic stylish black to a flashy mirror coating. We got you covered for the right style when hitting the slopes.

BODY PROTECTION

WINTER COLLECTION 2017-18

BODY PROTECTION TECHNOLOGY

WE GOT YOUR BACK!
FULL ACTION REQUIRES FULL PROTECTION. NOT LIMITING FREEDOM OF MOVEMENT, OUR PROTECTORS INCREASE THE SAFETY WHEN HITTING THE SLOPES.

FEATURES

REMOVABLE PROTECTION UNIT

The Protection Unit can be removed from the parent garment for ease of washing.

REMOVABLE SHOULDER STRAPS

Removable Shoulder Straps can be easily removed and reattached to comply with FIS regulations.

ADJUSTABLE CONNECTOR STRAPS

Adjustable trouser connector straps

EXTRA WIDE WAIST BELT

The height adjustable waist belt measures 120mm in width and delivers a secure, comfortable fit.

MATERIAL

SAS TEC VISCOELASTIC FOAM

Viscoelastic Foam is a soft, conformable, shock absorbent, temperature resistant material with a 10-year guaranteed lifespan; it also can take repeated beatings and still keep protecting.

POLYGIENE®

Polygiene® permanent odor control technology is based on silver salt made from recycled silver. It neutralizes odor by stopping the growth of bacteria on the fabric, so you can wear more and wash less.

THERMO FLEECE

Thermo Fleece delivers warmth, wicks moisture, doesn't restrict movement, has a soft inner and durable, anti-pile treated exterior; tough, yet cosy.

3D MESH

3D Mesh is a three-dimensional fabric that allowing optimal air circulation between fabric and skin.

FLATLOCK SEAMS

High elasticity and tensile strength make Nylon 6 a good choice for applications where toughness, impact resistance and durability are critical.

COMFORT

Dual-density Comfort Foam with Microfleece is a bonded foam with a soft fleece for added comfort. The two foams serve different purposes, including anti-fogging, climate regulation and padding while the fleece creates the ideal comfort layer between goggle and skin.

SPEED SNAP LENS EXCHANGE

Speed Snap Lens Exchange is a fast and easy lens exchange system. Lenses snap in and out quickly and easily allowing a rider to keep up with the changing light conditions.

GOGGLES TECHNOLOGY

TRANS VISION TECHNOLOGY TVT

TVT is a contrast enhancing technology for variable weather conditions. TVT lenses are also highly scratch resistant.

PERFECT LOOK, PERFECT SIGHT.
INNOVATION IS IN OUR DNA - WE DESIGN PRODUCTS THAT MEET THE HIGH STANDARDS OF OUR ATHLETES. RICH IN FEATURES, DESIGNED RIGHT DOWN TO THE DETAIL.

FEATURES

EXTREME WIDE FIELD OF VISION

Head's goggles with an extra wide field of vision are perfect for athletes allowing a tight aerodynamic tuck position without impaired vision.

SPARELENS INCLUDED

Sparelens included

SPEED SNAP LENS EXCHANGE

Speed Snap Lens Exchange is a fast and easy lens exchange system.

INTERCHANGEABLE LENSES

Interchangeable Lenses means that they can be changed to suit light conditions or when damaged.

FRAMELENS

The Framelens is a sub-frame construction that holds the lens that can be changed using the Speed Snap System.

DOUBLE LENS

Outside break resistant hardcoated PC-lens, inside Acetate lens with antifog coating

TORIC LENS

Toric lenses are curved in a way which avoids optical distortion.

CYLINDRICAL LENS

The Cylindrical Lens is a flat lens with a single lateral curve.

UV400 & ANTI FOG

UV400 & Anti Fog refers to the intense UV protective qualities of HEAD lenses and their ability to minimise fogging.

FILTER CATEGORY

Filter Category describes the specific light filtering of lenses.

TRANS VISION TECHNOLOGY (TVT)

TVT is a contrast enhancing technology for variable weather conditions. TVT lenses are also highly scratch resistant.

FMR

FMR is HEAD's flashy multi-layer mirror finish to their lenses providing added protection against sunlight.

MR

MR is HEAD's single mirror finish to their lenses providing added protection against sunlight.

MATERIAL

WINDSEAL FOAM

Windseal Foam is a wind retardant foam.

VENTING FOAM

Venting Foam allows the transfer of air, heat and moisture.

TRIPLE LAYER FOAM

Dual-density Comfort Foam with Microfleece is a bonded foam with a soft fleece for added comfort.

DOUBLE LAYER FOAM

Comfort Foam with Microfleece is a single density foam that regulates a goggles inner climate, cushions and provides the perfect skin to goggle interface.

COMFORT FOAM

Comfort Foam is a single density foam that allows for the ideal inner goggle climate.

SILICONE LAYER

The Silicone Layer provides added grip between a goggle strap and on-mountain headwear.

HELMET TECHNOLOGY

HARDSHELL

This helmet technology is matchless in longevity and impact protection. For this reason we use it in our race and rental helmets.

IN MOLD

The shock absorbing inner EPS layer of this technology is injected through the hard outer polycarbonate layer to create a single comprehensive unit that provides perfect protection at a reduced weight.

HELMET CONSTRUCTION

CONSTRUCTION

DUAL DENSITY CORE

This patented core technology is made from EPS with dual densities. This increases the helmets impact performance and suitable according to the FIS RH 2013 standard.

CARBON

The helmets shell is made from carbon fibres, which increases safety and decreases weight. This is why this technology is used for our racing helmets.

LOWER MICROSHELL

The lower edge is coated with polycarbonate in order to avoid scratches and dents in the foam.

VISOR CONSTRUCTION

HEAD Visor Construction is a wind-sealed UV protective shield that allows skiers to ride wearing prescription glasses. Like on a motorcycle helmet the visor can be pulled down to protect the eyes while riding.

TOOLFREE CHINGUARD

The angle of our all-new Toolfree Chinguard can be adjusted individually, without using any tools. The chinguard can also be taken off, when not needed for training, or racing gates.

VENTILATION

ADJUSTABLE VENTILATION

The opening of the ventilation ducts on the top of the helmet may be adjusted continuously by means of a slide control.

THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to the inside.

ACTIVE BOTTOM EDGE

An Active Bottom Edge in HEAD helmets reduces goggle fogging by delivering active airflow. It does this by allowing air to be drawn from the goggles through the helmet.

VENTURI EFFECT

The Venturi Effect creates the ideal inner helmet climate. It does so when air passing over the helmet draws out heat and moisture for the inner shell.

LINING

MICROFUR

Microfur is both warming and comfortable on the skin. As a helmet lining it creates the perfect fit and feel for all-day shredding.

MICROFLEECE

The soft Microfleece material has several functions: it feels good, draws moisture from the skin and transports it away from the head.

BEANIE LINER

The soft lining material of the Beanie Liner adapts perfectly to the head and thus avoids any pressure points and the unpleasant entering of cold air. Molded-in mesh zones let heat and moisture escape to the outside and, together with the ventilation system, ensure a pleasant head climate.

COMFORT ZONE LINER

Soft liner pads provide perfect fit & comfort at a fraction of the weight.

CANTILEVER

A special liner construction that allows the fit system free movement without creating pressure points and wrinkles.

EARPADS & FITTING

NECKGATOR

The Neckgator provides comfort and warmth to the helmet wearer. It adds comfort, fit and excludes the elements.

REMOVABLE EARPADS/NECKGATOR

These ear pads and neckgators can be removed to suit the variable weather conditions and for cleaning.

360° BOA FIT

The 360° Fit system by BOA evenly adjusts the fit of the helmet to all shapes of head.

270° BOA FIT

The 270° Fit system by BOA evenly adjusts the fit of the helmet to all shapes of head.

HEAD 3D FIT

Head 3D Fit allows an exact horizontal as well as vertical adjustment of the helmet to the shape of your head.

HEAD 2D FIT

The size adjustment system may be varied horizontally in order to individually adjust the helmet to your head.

METAL CHINSTRAP BUCKLE

The Metal Chinstrap Buckle is both durable and tactile. Made from metal it also adds to the look of a HEAD helmet.

CERTIFICATION

CE EN 1077:2007 CLASS B

CE EN 1077 is the European standard for ski & snowboard helmets, taking into account the results of collision tests to ascertain dampening and puncture resistant qualities of the outer shell. Class B of this certificate certifies helmets with soft ear protectors.

CE EN 1077:2007 CLASS A

The certification procedure for Class A is used for racing helmets with hard ear protectors, requiring high standards of puncture resistance.

ASTM F 2040

The North American equivalent to the European CE-Test uses comparable methods.

FIS RH 2013

These helmets comply with FIS GS/SG/DH helmet regulations.

HELMET FITTING

FIND THE RIGHT SIZE

Measure your head circumference with a tape measure which you apply above your ears.

PUTTING ON THE HELMET

helmet and adjusting the chin straps The helmet shall sit tightly on your head directly above your eyebrows. Adjust the two chin straps so that they solidly fix and hold the helmet.

CHECK FIT WITH GOGGLES

In order to check the perfect fit of the helmet, please put on your goggles. There should be no gap between the upper edge of your goggles and the helmet.

ACCESSORIES

WINTER COLLECTION 2017-18

HEAD[®]

REBELS TRAVELBAG

ARTICLE NUMBER

383007

FEATURES

Big wheelee bag for ski pros and world travelers
Additional zipper on the top to access main compartment
Inline Skating wheels
Long stowable pull handle for easy carrying;
Additional compartment at the top
Straps for tightening can also be hidden

DIMENSIONS 55 x 46 x 81 cm

VOLUME 88,7 L

WEIGHT 4 kg

REBELS BACKPACK

ARTICLE NUMBER

383017

FEATURES

Daypack with integrated laptop pocket
Variable opening
Bag width adjustable
Fully adjustable padded dorsal strap system
Bottle pocket & jacket holder

DIMENSIONS 35 x 48 x 22 cm

VOLUME 25,8 L

WEIGHT 0,68 kg

REBELS RACING BACKPACK

ARTICLE NUMBER

383037 Large

383047 Small

FEATURES

Big backpack for racers, coaches and tech-reps
One front and two side pockets
Fleece lined goggle pocket
Developed in collaboration with racing department.
Auto-lock zipper

DIMENSIONS 53 x 65 x 35 cm (Large)

33 x 50 x 33 cm (Small)

VOLUME 79,2 L (Large)

36,0 L (Small)

WEIGHT 1,60 kg (Large)

1,26 kg (Small)

REBELS DOUBLE SKIBAG

ARTICLE NUMBER

383027

FEATURES

Protective bag for 2 pairs of skis
Two wheels for carrying comfort
Easy-to-adjust compression straps
Diagonal zipper for easy access
Velcro handle for carrying comfort
Additional pole compartment

DIMENSIONS 203 x 18 x 28 cm

VOLUME 67,2 L

WEIGHT 2,76 kg

SINGLE SKI BAG

ARTICLE NUMBER

383057

FEATURES

Protective skibag for one pair of skis
Extendable to a length of 200 cm
Equipped with two buckles and easy-to-adjust compression straps diagonal zipper
Velcro handle for carrying comfort

DIMENSIONS 200 x 12 x 22 cm

VOLUME 55,2 L

WEIGHT 0,93 kg

DOUBLE SKIBAG

ARTICLE NUMBER

383067

FEATURES

Protective skibag for two pairs of skis
Extendable to a length of 200 cm
Equipped with two buckles and easy-to-adjust compression straps diagonal zipper
Velcro handle for carrying comfort

DIMENSIONS 200 x 12 x 27 cm

VOLUME 67,2 L

WEIGHT 1,03 kg

SKI TRAVELBAG

ARTICLE NUMBER

383187

FEATURES

Big wheellie bag with large main and various small compartments
Stowable pull handle
Business card window and high quality wheels

DIMENSIONS 80 x 33,7 x 33 cm

VOLUME 73,4 L

WEIGHT 2 kg

BOOT BACKPACK

ARTICLE NUMBER

383087

FEATURES

Zippered main ski boot compartment
Additional shoe and accessories compartment

DIMENSIONS 32,4 x 38 x 25,4 cm

VOLUME 36,2 L

WEIGHT 0,47 kg

BOOT BAG

ARTICLE NUMBER

383077

FEATURES

Velcro handle for carrying comfort
NEW opening system: No more dirty feet while getting into your ski boots
Adjustable carrying straps

DIMENSIONS 45,7 x 40 x 25 cm

VOLUME 28,4 L

WEIGHT 0,52 kg

FREERIDE SINGLE SKIBAG

ARTICLE NUMBER

383127

FEATURES

Protective ski bag for one pair of skis
Length 185 cm - extendable to 195 cm
Equipped with two buckled, easy to adjust compression straps and a comfortable carrying strap
Velcro handle for carrying comfort

DIMENSIONS 185 x 25 x 5 cm

VOLUME 59,4 L

WEIGHT 0,73 kg

FREERIDE BOOT BAG

ARTICLE NUMBER

383147

FEATURES

Boot bag for one pair of ski boots
Zippered main compartment
Easy opening system
Adjustable shoulder strap

DIMENSIONS 39 x 41 x 29 cm

VOLUME 25,8 L

WEIGHT 0,49 kg

FREERIDE BACKPACK

ARTICLE NUMBER

383107

FEATURES

Horizontal and vertical ski carry options
Vertical snowboard carry straps
Storable ski carry and ice axe straps
Helmet carrying system
Additional back opening
Including rain shelter
Lightweight material
Easy tightening system

DIMENSIONS 30 x 50 x 21 cm

VOLUME 23,3 L

WEIGHT 1,04 kg

LEARJET

ARTICLE NUMBER

374435

FEATURES

Water resistant nylon material
Durable ripstop construction
Highquality YKK Zipper
Heavy duty webbing reinforcements
Bottom & edge protection
3 stop telescope handle
Comfy neoprene handle

PROTECTION

HEAD®

RENTAL COLLECTION

RENTAL SIZE ADJUSTER

Rental Size Adjuster is super durable and provides quick and easy adjustability.

SD+D COMPATIBLE

SD+D Compatibility means that a product is compatible with HEAD rental helmet storage systems. It allows for safe storage, easy drying and leads to a longer life of products.

COLOR CODED

Rental Colour Coding allows shop staff to quickly and easily determine a product's size and compatibility.

4 COLORS + 4 SIZES

The all-new T-Series comes in four sizes, all featuring their own specific shell mold. This is especially important on smaller sizes, where weight and fit is crucial to assure the protective qualities of a helmet.

T-SERIES
DEVELOPED AND BUILT FOR RENTAL

HELMET STORAGE RACK

HEAD has the solution for efficient storage of helmets: the HELMET STORAGE RACK can be adjusted to the space and quantity requirements of the client and provides both space and easy access for up to 324 helmets on a floor space of 3 m².

HELMET STORAGE RACK 150	HELMET STORAGE RACK 200	HELMET STORAGE RACK 240
375502	375512	375522
for 180 helmets	for 252 helmets	for 324 helmets

HELMET DRYING RACK

In addition to the advantages of the HELMET STORAGE RACK, the HELMET DRYING RACK guarantees rapid and effective drying of the helmets via an integrated drying module. Warm air is directed inside the helmet via the AIRDOCKs and dries the helmets from the inside out, thus reducing drying time to a minimum. The optional ionization tube integrated directly into the air intake also prevents development of odor in the helmets. Both the HELMET STORAGE RACK and the HELMET DRYING RACK are available in widths of 150 cm, 200 cm and 240 cm as free-standing racks on legs. Existing track Systems of the brand MONTANA can be integrated if required.

HELMET DRYING RACK 150	HELMET DRYING RACK 200	HELMET DRYING RACK 240
375532	375542	375552
for 180 helmets	for 252 helmets	for 324 helmets

HELMET WALLDRYER 100

375572

The helmet WALLDRYER 100 completes the portfolio of the SD + D System; it can hold 60 helmets on only one meter or three feet of wall space. Helmets attached to the System can be automatically dried during storage. Standard household power supply can be used to operate the unit on 220 V or 110 V. This not only makes the smallest version of a full-feature SD + D System an easy step into the System, but it also fulfills the needs of smaller operations. The SD + D HELMET WALLDRYER 100 racks can be used free standing or standing against a wall.

FLIP CLIP RAIL

375442 1 meter
375452 2 meter
Tracks for the simple and individual assembly of the RENTAL INTERFACE. In the 1- or 2-meter version, the FLIP CLIP RAIL offers space for 3 or 6 rental interfaces.

HEAD SANITIZER

375462
With this easy-to-operate stainless-steel appliance you can disinfect rental shoes and helmets quickly and efficiently. Three spray jets ensure even distribution of the disinfectant over the whole shoe or helmet for controlled sterilization thereby preventing development of odors. The included table ensures an ideal working height and practical storage space.

RENTAL INTERFACE

375412
The starting point for the modular HEAD SD + D System. An interface offers space for space-saving and efficient storage of 3 helmets and can be used together with the FLIP CLIP RAIL, HELMET STORAGE & DRYING RACK, and HELMET WALLDRYER.

SNOWBOARD

RENTAL COLLECTION

HEAD®

LIQUID FRAMEWALL

WE JUST MADE OUR AWARD-WINNING FRAMEWALL EVEN BETTER

Liquid Framewall increases the durability of our boards and makes for a smoother ride at the same time. A unique moulded PU Framewall creates a seamless shock barrier for super resilience. The three-dimensional build of the Liquid Framewall covers the boards top sheet and prevents it from chip-

ping or other external hazards. It's soft material is even able to recover after an impact:

The three-dimensional build of the sidewall covers the boards top sheet and prevents it from chipping and other external hazards, which is resulting in delamination.

The FRAMEWALL is the first 360° protector on a snowboard - that stretches the boards durability considerably!

WOMAN SNOWBOARD RENTAL SYSTEM: LIBRA

HEAD BUILDS WOMEN'S EQUIPMENT FROM SCRATCH, FOCUSING ON FEATURES PARAMOUNT TO GIRLS; THESE ARE WEIGHT, BALANCE AND CONTROL ALL OF WHICH AID PROGRESS AND DELIVER A MORE SUPPORTIVE RIDE.

OUR WOMEN'S SNOWBOARD RENTAL PROGRAM IS NEXT LEVEL RIDING FOR GIRLS.

LIBRA LFW 4D
The most versatile and durable rental board out there, featuring the all new Liquid Framewall - developed to ride, for women who rent.

AIR YOUTH
Full action requires full protection.

650 4D BOA FOCUS WMN
High performing rental boot for everyday use. Built for women who know their roastbeefs from their melons.

P THREE 4D
Simple bulletproof rental binding in retail look.

THE 4D SNOWBOARD RENTAL SYSTEM

HEAD BRINGS YOU 4D - PERFECT SETUP, MOST EFFICIENT

We face each of our customers individually, cater to for their perfect setup when renting equipment. Having a positive experience when riding is the key driver to returning customers, no matter what age, gender, ability level or family situation they are - everyone has very own specific needs, which the HEAD 4D System and its wide product portfolio addresses.

And all of that in even less time. If you had to explain the all new 4D System with one word, it would be: Efficiency. But 4D also stands for functionality, reliability and innovation: It is the first snowboard rental System with integrated color coding for boots, boards AND bindings.

The all new 4D System manages it to cater for the perfect setup for every single customer of yours, and at the same time, being the easiest, quickest & most efficient snowboard rental System on the market. Although the benefits of 4D can only be fully exploited by using 4D compatible products, each product can also be used by itself or combined with non-4D products - thanks to its modular structure.

4D EFFICIENCY

With its fully integrated color coding, HEAD 4D snowboard rental Systems manages it to guarantee a perfect setup based on your customers boot size. **This makes the rental process quick and easy.**

ROCKA 4D JR

ARTICLE NUMBER

337706 ROCKA 4D JR + SpeedDisc
337766 ROCKA 4D JR

Sizes	Contact	Med. stance (cm)
90	60	30
100	67	32
110	75,3	36
120	82,6	42
130	92,0	44
140	101,0	46

FEATURES ROCKA 4D

- 4D compatible
- Rocka shape
- Exchangeable Tip & Tail Protectors
- Easy Rent topsheet
- Poplar wood core
- Easy maintenance die-cut base

RX 4D SPEEDDISC

ARTICLE NUMBER

347103

FEATURES

4D compatible, Reclining highback, Rubber dampened base, Padded highback, Power transmission strap, Dura tech toe strap

SIZES S/M/L

NX 4D SPEEDDISC

ARTICLE NUMBER

347403

FEATURES

4D compatible, AutoOpen Total, Toe & Heel base pads, Padded highback, Toolfree forward lean adjuster, Power transmission strap, Dura tech toe strap, Alu buckles

SIZES S/M/L

P THREE 4D SPEEDDISC

ARTICLE NUMBER

347503

FEATURES

Alu Heelcup, Toe & Heel base pads, Padded highback, 3D comfort strap, Dura tech toe strap, Alu buckles

4D compatible

SIZES S/M/L

P 4D JR SPEEDDISC

ARTICLE NUMBER

347603

FEATURES

4D compatible, JR specific construction, Padded junior highback, Fit ankle strap

SIZES JR

650 4D BOA FOCUS WMN

ARTICLE NUMBER

357055

SIZES 225, 235, 245, 250, 255, 260, 265, 270, 275, 280

650 4D BOA FOCUS

ARTICLE NUMBER

357045

FEATURES

4D compatible, Heavy Profile Rubber outsole, Frequency technology, Full toe and Heel protection, Fully covered BOA cable protection, Pro Fit liner, Bamboo Lining Mesh, Double BOA Lacing

SIZES 225, 235, 245, 250, 255, 260, 265, 270, 275, 280, 285, 290, 295, 300, 305, 315, 325

600 4D

TECHNOLOGY FEATURES SKI

ALLRIDE ROCKER: Rocker that is equally at home on bulletproof snow as it is in powder. This profile uses early rise in the tip with regular camber throughout the rest of the ski. 20% rocker - 80% camber.

DIECUT UHM C BASE: This durable workhorse base material is dedicated to all country skiing. Diecuts are added for flare.

E BASE BLACK: Basic black never goes out of style, and it's always durable. Easy gliding is everyone's friend.

ERA 2.0: ERA 2.0 is the little brother of ERA 3.0 and is everything 3.0 has to offer as far as design, performance and geometry integration, but without the addition of "Rebound" with its piezoelectric Intellifibers.

ERA 3.0: A masterful blend of three independently important technologies to make the ultimate allcountry skis. **ROCKER + RADIUS + REBOUND = ROCKER DONE RIGHT.**

ERA 3.0 S : "Sports version" of ERA 3.0 with a multifaceted ski designed with race innovation and inspiration, yet now with the addition of Rocker, Radius and Rebound. Totally new skiing experience with 10% rocker and 90% camber.

HIGHLY TRANSPARENT UHM BASE: A high-density, determinedly durable base that allows gorgeous graphic details to shine through. The perfect combination of fashion and function.

INTELLIGENCE™ TECHNOLOGY: Piezoelectric fibers that absorb vibrations at the speed of light. As you ski faster, the Intelligence™ stiffens the ski to increase stability. It adapts to where and how you ski.

INTELLIGENCE™ CHIP TECHNOLOGY: With Intelligence™ Chip Technology the electrical energy produced by the Intellifibers is not just recycled but accumulated and released bit by bit through a pre-programmed chip.

ISS - INDEPENDENT SUSPENSION SYSTEM: Elastomeric vibration killers located in the tip, tail and underfoot. The elastomers quiet the vibrations that are commonly associated with rockered skis. Underfoot, the vibrations are dampened to provide the skier with a smooth ride.

JUNIOR POWER FRAME: A geometric ski shape that provides structural strength to the outer edges of the ski through geometric design, as opposed to altering the core material or density of the ski. Also, for kids it looks cool and feels different than a standard flat ski.

KERS: A computerized piezoelectronic device that stores ski energy and releases it at the end of each turn. In reality, it's a turbo charger for your skis.

NANO TECH SURFACE: A permeable nonstick surface with similar molecular compounds and structure to that of a skis base material. This allows you to wax and alter the surface with standard ski wax to assure a lightweight nonstick and snow free surface for your trek up.

PNP ROCKER: Very subtle tip and tail rise with regular camber construction underfoot. PNP Rocker provides a rider a smother turn initiation as well as reduced edge contact to seamlessly butter into tricks and initiate spins. 30% rocker and 70% camber.

POWER SIDEWALL JACKET: An innovation in ski construction that combines the well known fiber jacket construction with ABS sidewalls. A light-weight ski with easy skiing performance including sidewalls for better dampening, shock absorption and edge grip. Performance at its best for its great target group.

RACE STRUCTURED UHM C BASE: The highest quality, fastest base and finish known to man. The technicians who build the skis for our World Cup Rebels use the same material and machines to put this scary fast base and structure into your skis.

RD RACING TOP SHEET: A thinner topsheet material designed to maximize responsiveness. Exclusive to our RD skis.

REBEL CAMBER: Some years ago it was years ago, it was rebellious to have rocker. Now, it's rebellious to have camber. With Rebel Camber, we feature explosive acceleration and excellent edge grip for the World Cup Rebel inside you.

SANDWICH CAP CONSTRUCTION: We take the basic framework from the world cup sandwich and place a cap that just wraps over the top edge of the sidewall to make the ski more suitable for all mountain skiing. Bomber construction with a rounded top edge makes for one incredible allcountry ski.

SANDWICH TWINTIP CONSTRUCTION: We blend a full vertical laminate wood core for durability and add our bomber Independent Suspension System for killing chatter. Pipe, park, big mountains, whatever, bring 'em on and let this construction rip.

STRUCTURED SURFACE: An extra-durable topsheet with a structured exterior. Designed to hold up against the most extreme abuse.

STRUCTURED UHM C BASE: The same high quality material used in HEAD's world-leading race skis is used here. Different structured running base for all conditions.

TNT ROCKER: Tip and tail rocker combined with regular camber underfoot. This combination creates a surfy feel in powder while maintaining hard snow versatility. 40% rocker - 60% camber.

TUFFWALLS: Impact resistant ABS sidewalls. While maintaining responsiveness, Tuffwalls are designed to take a beating

TWINTIP CONSTRUCTION: A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving twin tip construction is slightly softer than our sandwich twin tip layup, making it better for learning pipe and park tricks.

UHM C BASE: Our highly durable base material for getting the job done well. Not flashy, but steady and stable. The kind of base that will last for years.

WOOD CORE CAP CONSTRUCTION: A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving construction is slightly softer than our sandwich cap making it ideal for ramping up the learning curve.

WORLD CUP SANDWICH CONSTRUCTION: The basic construction invented by Howard Head in the 1940's, perfected and hand built by the finest ski technicians in the modern world. The vertical laminate wood core is embraced by speedfreak phenolic sidewalls and the finest Titanal. This is the fastest construction on the planet. Period.

TECHNOLOGY FEATURES BINDINGS

ABS - ANTI BLOCKING SYSTEM: The exclusive TYROLIA technology of the ABS continuous band allows the boot to move out of the binding almost without any friction, hence delivering maximum safety in case of icing up, dirt and boot wear.

RACE TOE: The new construction of the roller pincer system and its wings guarantee utmost stability. The newly designed wings overlap better with the ski boot interface - the innovative concept includes longer wings and is closer to the ski boot. Therefore, the ski boot is stable and attached to the binding with less forward pressure. The synchro adjustment of the wings provides precise adjustment to ski boot sole heights, preventing wobbling between binding and boot.

AFS - ANTI FRICTION SLIDER: New weight optimized adapter for gliding insert at Power Bindings for reduced friction, constant release values and maximum safety.

AFS JUNIOR: The innovative mechanical Anti Friction Slider (AFS) automatically adjusts to the boot sole height, compensating A/C standards as well as height differences due to icing up, dirt or boot wear.

AFS METAL: The 68 mm wide slider plus a stainless steel gliding element provides constant release values and results in a broader contact area to the ski boot sole.

AT TOE: The Alpine Touring (AT) Toe can be easily adjusted to alpine and touring boot norms and it secures constant release values also with rubber soles.

BRAKES: HEAD offers brakes with different width for optimal fit on wider skis and fat skis up to 150 mm ski width in the brake area. Some binding models are delivered without brake – "w/o brake" – to avoid brake exchange later on.

CLIMBING AID: The climbing aid with its different climbing positions, which can be operated without stepping out of the binding, provides excellent balance and effortless climbing.

DURA-COATING: Scratch resistant electrostatic powder coating provides environmentally friendly design, optimal durability and a variety of possible colors and color combinations.

FREEFLEX PRO: Best performance enabled by the innovative Freeflex Pro System. The free-gliding heel allows the ski to bend through unimpeded and to retain its natural dynamics. Due to the reduced stand height, the Freeflex band is now much closer to the ski boot. Constant release values reduce the risk of injury and ensure safe ski steering.

FR PRO TOE: The Freeride (FR) Pro Toe can be easily adjusted to different boot sole heights. Its horizontal spring reflects the modern architecture of the AAA-Series.

FULL DIAGONAL: Intelligent 180° release both horizontally and vertically of the Diagonal Toe and therefore ensures maximum safety in backward twisting-fall situations.

RX-DIAGONAL HEEL: The RX-Diagonal Heel provides maximum safety with a 150° release. Thus, pressure on the knee and ligaments upon twisting forward falls and the risk of injury are reduced.

SUPERLITERAIL SYSTEM: In combination with the integrated Freeflex-Function the SLR Base provides better energy transmission without affecting the natural ski flex. During the turn, this SuperLiteRail Base guarantees constant force distribution which leads to flawless control, thus enhancing the on hill experience. The remarkable benefits include highly efficient and agile ski performance.

RX TOE: The performance oriented RX toe defines stability and power, much as a strong and tough bull would extremely durable and absolutely reliable.

POWERRAIL: The unrivalled technology for retail, demo & rental by the well-received rail system on a modular basis provides easiest handling, maximum flexibility, optimized performance, perfect match, more stability and durability.

RACE DIAGONAL: Diagonal Toe tuned for racing purposes. Due to its higher release force vertically than horizontally, it holds up to the high backward lean forces in racing.

RACE LITE HEEL: The lighter variant of the Race Pro Heel for young up-and-comers and speed stars of tomorrow.

RACE PRO HEEL: The stand height was reduced according to the actual FIS rules. An increased contact area reduces friction and provides constant forward pressure in all skiing situations.

SX LITE HEEL: Weight optimized toe for junior and light-weight skiers with proven safety features of the HEAD/TYROLIA binding technology.

SOLID COLORED: Solid colored plastic parts are not coated with a separate color layer. Instead, the color has been added to the plastic granulate already. Thus, those parts are absolutely scratch resistant and durable but less color options are available.

SLR II BASE: With the 2-piece SLR II base, weight was reduced significantly. The benefits: easier turns, less fatigue and more fun on the slopes! The base offers 3 different mounting positions to cover boot sole lengths between 199 and 347 mm.

SX HEEL: Based on new kinematics the ski boot is precisely secure in the binding. This ensures exact and more direct power transmission from boot to edge.

SX JR. HEEL: The new junior heel with improved kinematics to increase safety and performance for junior skiers.

SX JUNIOR TOE: The innovative kinematics of HEAD's LX and SX adult line provide advantages in performance and stability for the SX Junior line for young speedsters as well.

SX KID HEEL: The SX Kid heel provides the little ones with the best in the latest technologies and safety standards for binding innovation and integrates the new kinematics for the younger set, too. Because safety is paramount, always.

SX KID TOE: With the SX kid toe for up-and-comers and integrated innovative LX/SX kinematics ski steering now requires even less effort.

SX TOE: The kinematic improvements are reflected in the product design of the SX toe as well. With its high cheek bones it reminds of a fox – smart, spry, agile and very clever.

TEFLON WIDE: The wide Teflon® insert ensures better force transmission, more stability and therefore optimal performance.

TELESCOPIC TUBE: With only one binding model it is possible to cover the entire range of different sole lengths (from 260 mm up to 350 mm).

TRP - TYROLIA ROLLER PINCE SYSTEM: The TYROLIA Roller Pincer Toe System (TRP System) of the HEAD bindings with its four rollers and gliding inserts ensure a 180° release and exact centering of the ski boot. The TRP system reduces the load on knees and ligaments and improves performance considerably.

TECHNOLOGY FEATURES BOOTS

LINERS

DOUBLE POWER BOOSTER VELCRO: The strap of the Double Power Booster Velcro works as a double pulley for better closure and a tighter wrapping on the cuff. The elastic Booster strap allows more dynamic response on the boot. The result is more precise transmission and faster ski reaction.

DOUBLE POWER VELCRO STRAP: Developed and patented by HEAD, this velcro strap uses a double-pulley system, which gives 100% more closing power, by reducing the effort needed by 50%. The length of the Double Power Velcro can be customized to "wide" or "narrow" by choosing between the internal or external ring. The result is exceptional support through the shaft of the boot.

HEATFIT (HF) LINERS: Multi-component liners with moldable inserts in liner and tongue. 5 minutes of heating, is all that is required, to make the lining adapting and get the perfect precision and comfort.

QUICK ENTRY LINERS: These liners come with a unique easy entry construction in the fore foot. Developed both for skiing and walking, Quick Entry liners always feel extremely comfortable.

PERFECT FIT (PF): Perfect Fit is the revolutionary customization system that provides the best level of precision, comfort and durability. The Perfect Fit material allows the liner to adapt to your feet, ensuring maximum power transmission. 5 minutes of heating at 80 degrees, is all that is required, to make the lining adapting and get the perfect precision and comfort.

PRO LINERS: Pro Series are thin and very supportive liners developed to assure maximum wrapping and extreme high performance. They come with a stretchy upper material, thermo-moldable ankle inserts and a rear sliding insert.

BUCKLES

DOUBLE POWER LEVER:

The Double Power lever reduces the effort needed to close the buckle by 50%. Developed and patented by HEAD.

DOUBLE POWER SPINEFLEX BUCKLE:

Spineflex buckle featuring Double Power lever.

DOUBLE POWER SPINE-TECH BUCKLE:

Spine-tech buckle featuring Double Power lever.

SPINEFLEX BUCKLE: A revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile. The constant closure point increases the overlap between the shell flaps and reduces pressure points. The increased comfort and precision results in better performance.

SPINE-TECH BUCKLE: The Spine-Tech buckle features a constant traction closure point. This translates into a reduction in pressure points, an increased overlap between shell flaps, more comfort, and more precision.

SUPERMACRO RATCHET:

An adjustable, ratcheted toothplate that provides 28 mm of calf-adjustment.

WIDE-BODY BUCKLE:

Oversize buckle designed for an extreme ease of use. The fastest way to close the boot's cuff.

FEATURES

ADAPTIVE FIT TECHNOLOGY:

HEAD patented mechanism in the sole which allows the user to change the width of the boot from 103 to 101 mm with one turn of a screw.

ADJUSTABLE REAR SPOILER:

Height adjustable spoiler increases rearward support as it's raised.

ADJUSTABLE WEDGE ARCH SUPPORT:

Internal wedge with ON-OFF mechanism customizing the arch of the foot depending on its anatomy.

DOUBLE ADJUSTABLE PROFILE: A double mechanism in the upper rear part of the boot which adapts the circumference of the cuff up to 1 cm to fit individual anatomical needs. Located on the either side of the cuff's spine, this mechanism allows the cuff to adjust up to 1 cm to better fit the anatomical needs of skier.

EASY ENTRY SHELL CONSTRUCTION:

Front plate easy opening construction to let the youngest get in smoothly.

EASY ENTRY SHELL DESIGN: Located in the throat of the boot, 4 channels are cut into the plastic to reduce the thickness of the material and thus provide smoother entry and better wrapping to the foot.

ENERGY FRAME: Specifically designed to reinforce the EDGE line shell structure, the Energy Frame lands more stability and performance to the boot.

TRI(BI)-INJ. FRAME:

A high performance, multi-density shell that optimizes easy entry, foot wrapping, comfort and energy transmission.

FLEX STANCE TUNING: Screw mechanism with a plate support on the spine of the cuff. By adding the screw(s) the link between shell and cuff becomes stronger and the flex of the boot stiffer. It also works as a forward lean adjuster.

FLEX TUNING: A screw mechanism on the spine of the cuff that links shell and cuff. To get a softer flex, the screw(s) can be replaced by the plastic caps included in the box.

INTEGRATED AUTOSKIWALK (ASW): HEAD patented integrated device which automatically switches between skiing and walking position when stepping in or out of the bindings.

POWER CONTROL FRAME:

Designed to reinforce the Cube 3 line shell structure in order to give more stability and performance to the boot

SKI-HIKE SYSTEM:

Is a device which allow the easiest selection of ski and hike mode available. Provides a powerful connection between the cuff and shell for maximum precision and impulse transmission while skiing.

SOFTWALK HEEL + GRIP SYSTEM: HEAD patented cushion positioned in the heel for shock absorption and smoother heel striker, without compromising the performance. The grip system is a rubber insert which provides grip for walking on slippery surfaces.

STIFFER/SOFTER FLEX ADJUSTMENT: It's an adjustment placed on the spine of the cuff to select between a stiffer or softer flex depending on snow condition and level of skiing.

SHOCK ABSORPTION WEDGE:

A rubberized boot board that allows for smoother riding over varied terrain and shock-free landings.

WOMEN SPECIFIC SUPPORTIVE HEEL OPTION:

A heel lift developed exclusively for women to be placed into the boot for optimized heel retention and maximum comfort.
