THE RACING COLLECTION OF OLYMPIC GOLD WINNERS AND WORLD CHAMPIONS!

In racing each hundredth of a second decides between victory and defeat. That's why together with our HEAD World Cup Rebels we are always looking for that decisive advantage. The 2021/22 season sees our successful Racing Collection enter its second year, and together we are going to write another chapter of racing history.

I am convinced that our HEAD World Cup Rebels are all set to show that the path to victory can only lead through them in the 2021/22 World Cup season. We have a great team lined up at the starting gate again, ready to continue the unique success story of the HEAD World Cup Rebels in every discipline. Our Racing Collection can help you to ski beyond your previous limits.

Be part of our racing community! Sign up at www.head.com/rebelsclub to join the HEAD Rebels Club and grab some awesome treats. Including, the new HEAD Rebels Club app, which keeps you up to speed on the latest news and lets you share your favourite hobby with other ski racing fans.

Remember: We make the equipment - you make history!

Yours,
Rainer Salzgeber

BUILT FOR THE BEST, BY THE BEST.

This season, racing history will be made. Because, in the Rebel's world, our research and development is constantly refining all our products. That's why you can have complete trust in everything we make.

A commitment to precision, performance and winning. If one person sums up what World Cup Rebels purpose is, that person has to be Aksel Lund Svindal, which is why we have worked with him to develop the all new race line.

“ A ski you can fully trust with more grip on the snow, letting you fully focus on your technique. ”

BEHIND THE SCENES

**Athletes and engineers.
Two jobs, one goal.**

The problem with a superbly engineered ski is, if it performs well, you hardly even notice it. It's exactly the same for a well-designed ski boot. It's so precise, you're not really aware of it at all. But that's the whole point, don't think about the ski or the boot or any other part of your kit, just focus on one thing – the finish line. And that's exactly how it should be.

At HEAD, we're inspired by those who focus on what matters, people who have their eyes on the prize and breaking records. If you ever visit our headquarters in Austria, you'll see that these are the kind of people we hire. These are the people who know that technology and engineering can be the difference between the glory of winning and the agony of defeat. Together, we're pushing skiing forward, inspiring more and more people to put on our equipment – and then to promptly forget about it and just enjoy this beautiful sport.

Our goal is to give you total freedom. You don't have to think of anything except your own performance. This is our purpose.

**We make the equipment –
you make history.**

GOOD VIBES

THE WORLD'S ONLY ELECTRONIC SKI DAMPENING SYSTEM

EMC - ENERGY MANAGEMENT CIRCUIT
REDUCING NEGATIVE VIBRATIONS SO YOU CAN FULLY TRUST
THE SKI AND FOCUS ONLY ON YOUR OWN PERFORMANCE

GOOD VIBES ONLY

YOU CAN TRUST EMC TO DELIVER SMOOTH SKIING AND EXCEPTIONAL EDGE GRIP, WHATEVER THE CONDITIONS. WHEN THE SKI BENDS AND VIBRATES, IT TAKES THE KINETIC ENERGY IN THE SKI AND TRANSFERS IT INTO ELECTRICAL ENERGY, WHICH IS THEN USED TO ABSORB NEGATIVE VIBRATIONS FOR A SMOOTHER, MORE STABLE EXPERIENCE.

THE NEW MASTERS' RACE WEAPON

In season 20/21 HEAD offers a dedicated Masters ski for the first time.

One new model in four different sizes, same wider footprint, distinguished only by its radius. Therefore we can offer a tailor made setup for each individual needs and requests.

The skis offer the same construction and technology as the FIS certified models. The big difference is the wider footprint as it delivers a less aggressive setup but full performance. The lower radius allows for easier and super manoeuvrable handling.

That would be the best characterization as the Masters rules don't follow the FIS rules.

RAPTOR WCR

THOUSANDS OF TINY CHANGES, ONE GIANT LEAP IN PERFORMANCE.

Just like our athletes, we continuously fine tune our performance, winter after winter we trial, we test, we improve. Hundreds of incremental changes have been made to our famously fast race boot, resulting in one big difference. Every meticulous adjustment has been made with one thing in mind, speed. We think so, our athletes know so, the new race boot is the fastest ski boot ever designed.

**" Boot feels smoother
and easier to turn..."**

Anna Veith

**" ...I have also a good balance
with this boots coming from
a better forward position.**

Alexis Pinturault

**" ...The first part of the turn is
also easier without being too
aggressive. But everything
is very positive so far.**

Johan Clarey

**" My first impression is that
it is very stable and has a
good driving behaviour..."**

Matthias Mayer

NEW BUCKLE POSITIONING

The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

EXTENDED TOE BOX AND MATERIAL

The longer toe box has been designed to reduce torsion and increase power transmission. Combined with new PU material, provide a more progressive flex, smooth rebound and less vibration for better control.

CUFF ALIGNMENT

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

NEW WCR BOOT BOARD

The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

RACE BALANCE

Ramp angle: 4°
Forward lean (new): 9°
Forward lean (classic): 16°

ADJUSTABLE TONGUE

Position the tongue for a perfect personalized fit

LIQUID FIT

Precise heel and ankle retention for higher level of performance.

DOWNFORCE HELMET

This is the new benchmark in helmet design. A strong, durable shell in a streamlined, aerodynamic shape that's also extremely light and incredibly safe. It has a speed mode with acoustic adapters and a gate mode where the adapters can be exchanged for a chin guard for technical disciplines.

SPEED MODE

The Acoustic Adapter plates are optimized for speed disciplines, improving the perception of surrounding sounds and the sense of balance.

GATE MODE

The Chin guard Adapter plates are used for mounting a chin guard to the DOWNFORCE helmet for technical disciplines.

SPOILER

The spoiler at the back of the helmet diffuses the air stream and therefore adds to the aerodynamics, as well as limits the generation of noise.

STREAMLINED DESIGN

The outline of the DOWNFORCE is designed to limit air drag to the minimum.

SUPER LIGHT WEIGHT

Using lightweight components and Dual Density technology, the DOWNFORCE is amongst the lightest racing helmets in the market.

HIGHEST SAFETY LEVEL

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

FIS CERTIFICATION

All DOWNFORCE models are complying to EN 1077, ASTM 2040 and FIS 2013 standards.

ULTRAMATCH

The goggle intake of the DOWNFORCE is optimized for the SENTINEL goggle - this combination creates a perfectly integrated racing unit.

THE NEW LENS TECHNOLOGY

SEE CRYSTAL CLEAR

◆ COLOR BRILLIANCE ◆ HIGH DEFINITION OF CONTRAST ◆ INCREASED ATTENTION

5K ENHANCES CONTRAST AND BOOSTS COLOR BRILLIANCE BY FILTERING SPECIFIC WAVE LENGTHS OF THE VISUAL SPECTRUM, THEREFORE REVEALING MORE DETAILS AND ASSURING A SAFER, LESS TIRING ON-SNOW EXPERIENCE IN ANY WEATHER CONDITION. THE 5K LENS TECHNOLOGY IS AVAILABLE FOR ALL RACE GOGGLES, INCLUDING THE NEW CONTEX PRO RACE.

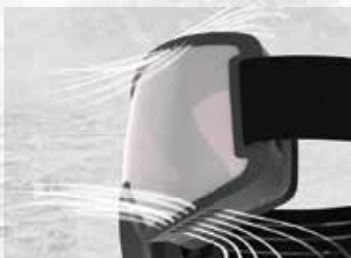

THE ALL NEW CONTEX PRO

The CONTEX PRO is packed with tons of features and style. The new Laminated Double lens is enhancing the field of vision by 15%, compared to a traditional double lens construction - it also has supreme anti-fog treatment and reduces lens glare. The unrestricted field of vision is supported by our new 5K lens technology, boosting contrast and color brilliance.

OPTIMIZED TRACTION STRAPS

The straps outlets of this goggle are placed in the front, therefore assuring a snug and secure fit when worn together with a helmet, by optimizing the traction applied.

DYNAMIC VENTILATION SYSTEM

The ventilation system is designed to allow air to enter the goggle from three sides, therefore creating an airstream which assures a perfect climate inside the goggle.

LAMINATED DOUBLE LENS

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.
