WHAT'S UP WORLD CUP REBELS!

In season 20/21 we will continue to write racing history. Coming up with a new ski technology "EMC", a new binding, new boot, new helmet, new goggle, new pole and updated racing bags. Working with our World Cup Rebels and translating their feedback into new, fresh products and updates was again exciting, intensive but also very successful.

PURITY, TRUST, MOMENTUM. Those are three core values we believe and keep pushing. Purity in design and in construction to fully trust your equipment to keep up with the great Momentum ski racing offers.

We believe our equipment will help you achieve new goals and push your limits without compromising your safety.

Trust us, we make the equipment - you make history.

Yours,
Rainer Salzgeber

**WE MAKE THE EQUIPMENT
YOU MAKE HISTORY**

#WHATSYOURLIMIT

WORLD CUP REBELS LINE

BUILT FOR THE BEST, BY THE BEST.

This season, racing history will be made. Because, in the Rebel's world, our research and development is constantly refining all our products. That's why you can have complete trust in everything we make.

A commitment to precision, performance and winning. If one person sums up what World Cup Rebels purpose is, that person has to be Aksel Lund Svindal, which is why we have worked with him to develop the all new race line.

“ A ski you can fully trust with more grip on the snow, letting you fully focus on your technique. ”

BEHIND THE SCENES

Athletes and engineers. Two jobs, one goal.

The problem with a superbly engineered ski is, if it performs well, you hardly even notice it. It's exactly the same for a well-designed ski boot. It's so precise, you're not really aware of it at all. But that's the whole point, don't think about the ski or the boot or any other part of your kit, just focus on one thing – the finish line. And that's exactly how it should be.

At HEAD, we're inspired by those who focus on what matters, people who have their eyes on the prize and breaking records. If you ever visit our headquarters in Austria, you'll see that these are the kind of people we hire. These are the people who know that technology and engineering can be the difference between the glory of winning and the agony of defeat. Together, we're pushing skiing forward, inspiring more and more people to put on our equipment – and then to promptly forget about it and just enjoy this beautiful sport.

Our goal is to give you total freedom. You don't have to think of anything except your own performance. This is our purpose.

**We make the equipment –
you make history.**

GOOD VIBES

THE WORLD'S ONLY ELECTRONIC SKI DAMPENING SYSTEM

EMC – ENERGY MANAGEMENT CIRCUIT

Reducing negative vibrations so you can fully trust
the ski and focus only on your own performance.

GOOD VIBES ONLY

You can trust EMC to deliver smooth skiing and exceptional edge grip, whatever the conditions. When the ski bends and vibrates, it takes the kinetic energy in the ski and transfers it into electrical energy, which is then used to absorb negative vibrations for a smoother, more stable experience.

WORLDCUP REBELS E-SL RD FIS

Slalom pros and advanced skiers just found their ultimate competition ski.

THE NEW MASTERS' RACE WEAPON

In season 20/21 HEAD offers a dedicated Masters ski for the first time.

One new model in four different sizes, same wider footprint, distinguished only by its radius. Therefore we can offer a tailor made setup for each individual needs and requests.

The skis offer the same construction and technology as the FIS certified models. The big difference is the wider footprint as it delivers a less aggressive setup but full performance. The lower radius allows for easier and super manoeuvrable handling.

That would be the best characterization as the Masters rules don't follow the FIS rules.

WORLDCUP REBELS E-GS RD

The perfect ski for your next giant slalom mission.

RAPTOR WCR

THOUSANDS OF TINY CHANGES, ONE GIANT LEAP IN PERFORMANCE.

Just like our athletes, we continuously fine tune our performance, winter after winter we trial, we test, we improve. Hundreds of incremental changes have been made to our famously fast race boot, resulting in one big difference. Every meticulous adjustment has been made with one thing in mind, speed. We think so, our athletes know so, the new race boot is the fastest ski boot ever designed.

“

Boot feels smoother
and easier to turn...

Anna Veith

”

“

...I have also a good balance
with this boots coming from
a better forward position.

Alexis Pinturault

”

“

...The first part of the turn is
also easier without being too
aggressive. But everything
is very positive so far.

Johan Clarey

”

“

My first impression is that
it is very stable and has a
good driving behaviour...

Matthias Mayer

”

NEW CANTING

Provides more precise adjustment, more stable connection and less friction between shell and cuff.

NEW BUCKLE POSITIONING

The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.

NEW STRUCTURE AND MATERIAL

The longer toe box has been designed to reduce torsion and increase power transmission. Combined with new PU material, provide a more progressive flex, smooth rebound and less vibration for better control.

NEW WCR BOOT BOARD

The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

RACE BALANCE

Ramp angle: 4°
Forward lean (new): 9°
Forward lean (classic): 16°

LIQUID FIT

Precise heel and ankle retention for higher level of performance.

LATERAL FLAPS

For a more precise wrap of the upper liner.

FREEFLEX ST

LESS DRAG, MORE SPEED

With ADAPTIVE SUSPENSION TECHNOLOGY including lots of advanced features, HEAD and TYROLIA introduce the ultimate in the race binding segment. Less drag and more speed, locking you into the supreme race experience.

#WHATSYOURLIMIT

ADAPTIVE SUSPENSION TECHNOLOGY

Make the ultimate connection with a revolutionary security system that offers more precision and control than ever before. All of these features are encased in a low drag design for flat out fun.

LESS DRAG

New aerodynamic design reduces drag by 15%.

INDEPENDENTLY SPRING-LOADED PINCERS

For more precise control when you are pushing your limits.

ADJUSTABLE PRESSURE POINT

Fine tune the Freeflex ST for your skiing.

LOWER CONTACT POINT (ONLY X MODELS)

A 5 mm lower contact point between the rollers and the ski boot for a reduced tilting moment (~25%).

STEEL BASE PLATE

Direct power transmission for ultimate efficiency.

TRICKLE DOWN TECH.

It starts with our top of the range products but it doesn't stop there. Whatever we put into the best we make, ultimately finds it's way into everything we make. Superb performance available in a variety of DIN levels.

RACE BINDINGS

FREEFLEX ST 20 X RD

The new Stream toe of the Freeflex ST 20 X RD ski binding, features independent spring-loaded pincers and even more precise control.

ARTICLE NUMBER

100820 - matt black, Brake [A] 85mm

PRODUCT FEATURES

Stream Toe, AFD ST POM (X), Freeflex Pro, RACE PRO RD Heel

PRODUCT DETAILS

STAND HEIGHT	16 mm
DIN	10,5 - 20
WEIGHT	3150 g

FREEFLEX ST 20 X RS

The Freeflex ST 20 X RS, a forgiving binding with the new Stream toe, offers an increase in both control precision and direct power transmission.

WIN WITH CUTTING EDGE GOGGLE TECHNOLOGY

SENTINEL GOGGLE

See clearly in all conditions thanks to the new quick-lens exchange technology of these state-of-the-art goggles. Perfectly integrated with the DOWNFORCE helmet, the face foam can be exchanged to match your individual face form and the wind seal lips keep the wind out for when every millisecond counts.
