# THE DNA OF THE HEAD WORLD CUP REBELS FOR VICTORY!

Having notched up many impressive performances last season, the HEAD Worldcup Rebels once again earned the accolade of the best ski team in the world. Number one in the FIS Brand Ranking, an overall World Cup Crystal Globe and two discipline Crystal Globes won by Lara Gut-Behrami, another Crystal Globe thanks to Cornelia Hütter, 17 World Cup race victories – these awesome results can only happen if the whole team focuses on winning. That is why we consistently work together with our athletes on every detail, no matter how intricate. All of our experience is then integrated into our race collection. Ultimately, the equipment carries the DNA of the HEAD Worldcup Rebels. It is the DNA of champions!

This season we again have a strong team of experienced athletes and young talent ready to show from the start how victory can only be attained by the HEAD Worldcup Rebels. Full of anticipation, we are also looking forward to the greatest highlight of the 2026 season in Milan and Cortina d’Ampezzo. In Italy we want to stand out again as number one on the medal table.

In the new race collection we have optimised the side cut on several skis. The Downforce helmet has been reinforced with an additional layer of carbon on the inside and a robust film on the outside. As a result, the helmet now offers enhanced safety during Slalom training, and is much tougher. The basis for all of these developments is the feedback from our athletes. What works perfectly for the HEAD Worldcup Rebels in the World Cup improves your performance with our new race collection.

Remember: We make the equipment - you make history!

Yours,  
Rainer Salzgeber  
HEAD Racing Director

# ONLY ONE BRAND OF RACING SKI MOVES THIS FAST

Our mission is to take what wins on the slopes and get it into every single race ski we build. Worldcup Rebel equipment is not just current, it's a benchmark. HEAD's engineers incorporate winning technology into everything they make with the same precision and intensity as our elite Worldcup Rebels bring to the race course. Equipment for the 25/26 season is no exception, think you can keep up?

## WHAT'S **NEW** THIS SEASON?

### NEW IMPROVED SIDECUT

The WCR E-GS REBEL FIS in length 193 cm has a slightly new sidecut which provides more power and precision and the sidecut of the WCR E-SL REBEL FIS in length 158 cm and 165 cm has been updated and optimized for slalom to provide a more direct line to the next gate. The updated sidecuts have been tested at the highest levels of competition. Consumers can now experience the same proven winning technologies that have propelled our Worldcup Rebels to the top of the rankings.

# FOCUS ON YOUR VISION

Be bold, be confident, be safe with HEAD equipment trusted by some of the world's best athletes. Our products are designed to offer you maximum safety and comfort with eye-catching design to keep you focused on the race. Whether in training or competition, we're here to help you achieve your VISION with confidence.

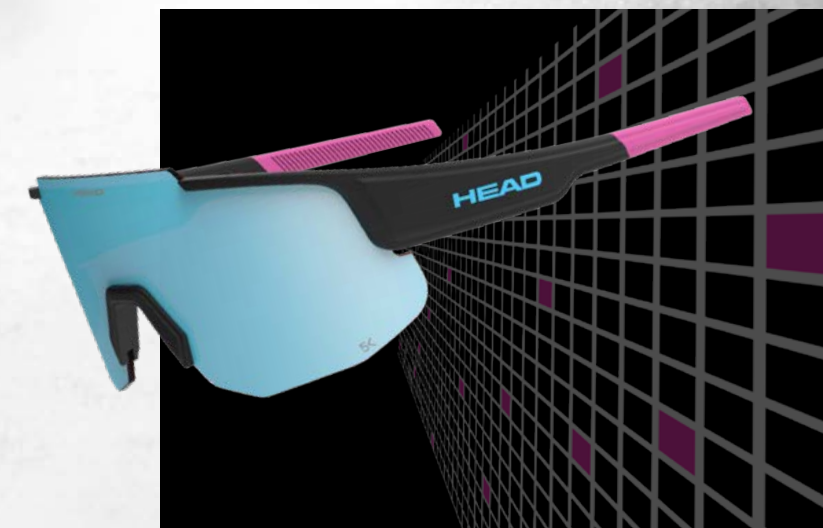

### THE DOWNFORCE RACING HELMET

A superb aerodynamic racing helmet with MIPS, designed specifically for competitive racing. The modular system makes it suitable for all alpine race disciplines. The RD construction features carbon reinforcement in the front to withstand slalom pole impacts, along with a strong transparent foil for added protection.

### ULTIMATE STYLE SUNSHIELD

New SUNSHIELD sunglasses are made for enthusiasts and trendsetters alike. These lightweight sport shades feature adjustable rubberized nose pieces and temples for a completely secure fit. The close-fitting lens gives optimum protection in any weather conditions, plus its extended field of vision and contrast-enhancing 5K Lens Technology, works for any sport.

# IT TAKES A TEAM OF DEDICATED EXPERTS TO WIN A MEDAL

## ASK ANY WORLD CUP REBEL

On the long journey to the start hut, nothing is left to chance. Everything is monitored, measured and assessed. What are the snow characteristics? How are the slope conditions? What about snow temperature and air temperature? The way the run has been set also plays a decisive role. Once the parameters are known, the right equipment selected and fine-tuned, it's suddenly all down to one person - the athlete. No two races are the same, no weather conditions are ever identical. This is the moment when the one thing you need is absolute trust in your equipment. We take all the technical experience we gain from hundreds of races in the World Cup and put it into every racing ski we make. Current and former HEAD Worldcup Rebels, add real experience and knowledge to help us further power the performance of our equipment. Our ambition is to be the best performing, most trusted equipment in the World Cup. To be the best on the planet, it takes an unbeatable team.

# THE MASTERS' RACE WEAPON

One model in four different sizes, same wider footprint, distinguished only by its radius. Therefore we can offer a tailor made setup for each individual needs and requests.

The skis offer the same construction and technology as the FIS certified models. The big difference is the wider footprint as it delivers a less aggressive setup but full performance. The lower radius allows for easier and super manoeuvrable handling.

That would be the best characterization as the Masters rules don't follow the FIS rules.

# DOWNFORCE FEATURES

WATCH THE HIGHLIGHT VIDEO

## NEW: RD CONSTRUCTION

The RD construction features carbon reinforcement in the front to endure slalom pole impacts, along with a strong transparent foil for added protection, similar to automotive materials.

## SPEED MODE

The Acoustic Adapter plates are optimized for speed disciplines, improving the perception of surrounding sounds and the sense of balance.

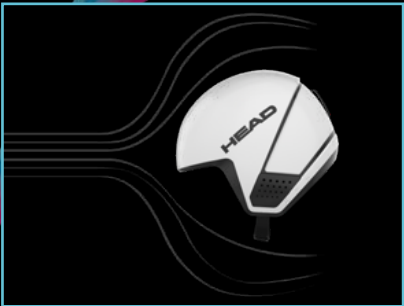

## GATE MODE

The Chinguard Adapter plates are used for mounting a chinguard to the DOWNFORCE helmet for technical disciplines.

## SPOILER

The spoiler at the back of the helmet diffuses the air stream and therefore adds to the aerodynamics, as well as limits the generation of noise.

## STREAMLINED DESIGN

The outline of the DOWNFORCE is designed to limit air drag to the minimum.

## SUPER LIGHT WEIGHT

Using lightweight components and Dual Density technology, the DOWNFORCE is amongst the lightest racing helmets on the market.

## HIGHEST SAFETY LEVEL

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

## FIS CERTIFICATION

All DOWNFORCE models are complying to EN 1077, ASTM 2040 and FIS 2013 standards.

## ULTRAMATCH

Developed together with our athletes, the DOWNFORCE helmet line is designed to perfectly integrate HEAD's race specific goggles.
